## Job Postings by Career Field

Finally, use your search engine to search according to your career goals. For example, if you're interested in positions in communication, search for communication job postings and bookmark sites that are helpful for the kind of positions you want. You can even search for job postings by career in certain geographic areas. Be creative in finding sites that will work for you in identifying openings.

**Remember, on-line resources are a terrific place to conduct PART of your job search and should not be the only way you conduct this search. Networking is also a key to unlocking your job search success.**
