NACM Career Mobility Core

What is the NACM Core?

The NACM Career Mobility Question Core is a set of items added to the First Destination Survey to gain additional insight into graduates' career-related educational experiences. These questions map to the National Alumni Career Mobility Survey for 5- and 10-year alumni. Research themes from the NACM survey that are found in this section include:

1. Influential Career Practices: NACM national research has found several practices that influence an alum's career mobility, such as networking with employers and creating a career plan.
2. Return on Investment: Measured through impressions of value of degree, career preparation, and satisfaction.
3. Career and Economic Mobility: Measured through satisfaction with career, earning potential, and student loan debt.

Influential Career Practices

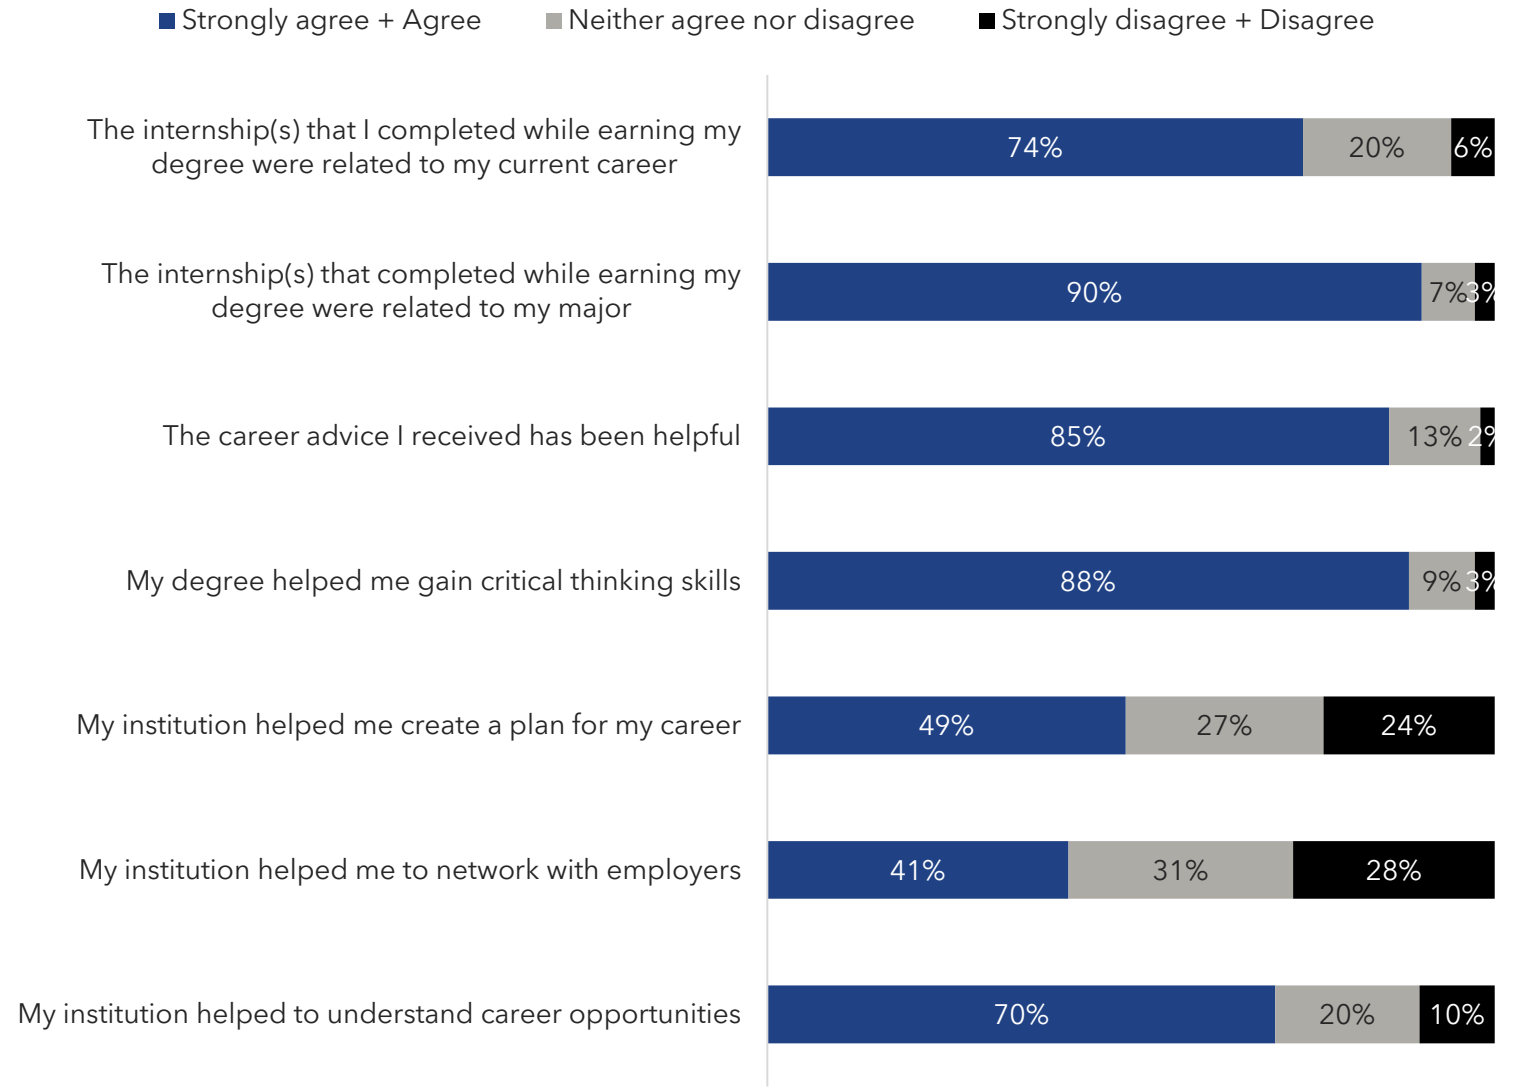

Did you receive career advice?

Did you complete an internship or related experience?

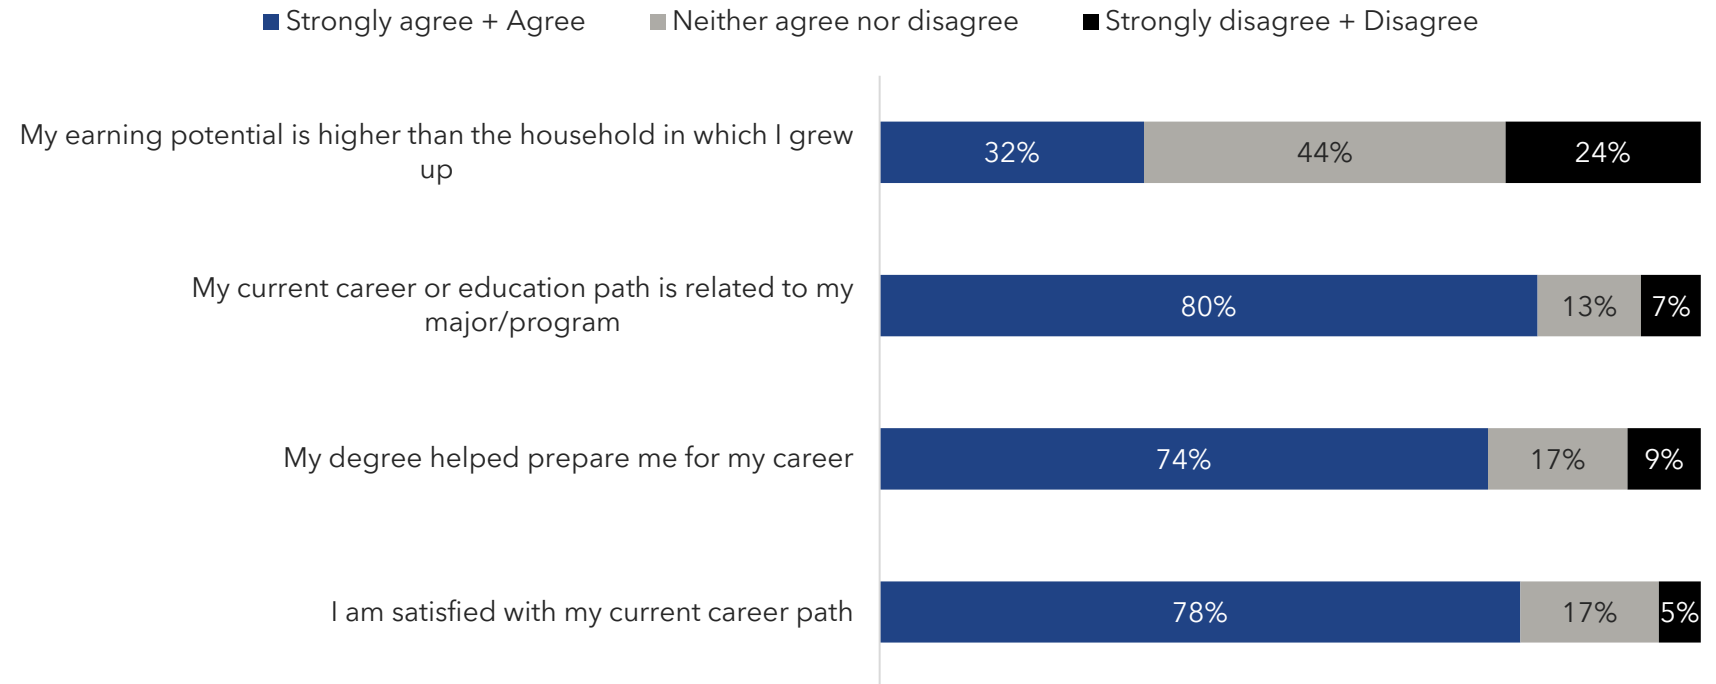

Influential Career Practices

Return on Investment

Career & Economic Mobility

Career & Economic Mobility

Was your internship paid or unpaid?

Did you incur student loan debt while obtaining your degree?

Do you feel that you are underemployed?
