## For Biology/Biochemistry advisors:

For each lecture section of Biology there are several kinds of "blocks" with different combinations of lab, Chem and Math:

Block	Courses contained in the block		
A	Biol 117, Biol 116	Chem 116	Math 221
В	Biol 117,	Chem 116, Chem 119	Math 221
C	Biol 117, Biol 116	Chem 116	
D	Biol 117,	Chem 116, Chem 119	

All students registering for these courses (Biol 116,117; Chem 116,119; Math 221) will require a block sheet to accompany their registration materials. Block sheets are located in binders near the Biology advising area in Milne Library.

The A-D blocks will entitle the students to register for all the sections listed on the sheet. Different sheets have different combinations of courses and sections. The combinations cannot be changed but there are lots of different ones. The easiest system is to find out what course the student wishes to take as their Intd 105 or elective and then find several blocks with that time period open. Offer the student a choice among this short list of options. It is important that any unused block sheets be returned promptly to the binder for other students to select and use. Do not throw sheets away even if you have written on them.

Blocks C and D are useful for students who already come to Geneseo with credit for Math (e.g. AP 4 or 5) and don't need to register for Math or wish to take an advanced course in Math (e.g. Math 222).

There are about equal numbers of Biology and Chemistry lab seats in blocks. Because of conflicts between scheduled Biology review sessions, Chem 116 03 lecture, lab times, and new Math 221 section schedules there is little flexibility in a number of blocks. Please, do not expect to rearrange sections.
