- 6. *Room Schedules by Lab*

## Enrollment Projections

### Enrollment Projection Process

The enrollment projections provide the basis for the master plan and the space needs at various phases. The Facilities Master Plan assesses the current space need, and projected space needs at 2013, 2018, and 2023, based on projected enrollment at these milestones. The consultants reviewed enrollment projections developed by both the SUNY System and the College, and analyzed the demographic trends from counties where Geneseo recruits its students. The consultant's findings support the enrollment aspirations of the College.

### Factors that Affect Enrollment

There are a number of factors that may affect enrollment, including distinctive and attractive programs, demographic projections for the areas from which the college draws students, state policies regarding education and growth, and the physical and organizational policies of the campus. For Geneseo, the exceptional Physics program and liberal arts offerings, along with its status as the unofficial "honors college" for the SUNY system, help attract students from a large geographic area. While there is no state policy regarding SUNY growth, Geneseo has the capacity to grow – a finding that is confirmed in the subsequent calculation of space needs. However, the College's commitment to maintaining student selectivity and improving student/faculty ratios have led the College to support a policy of decreased enrollment to enhance excellence.

### SUNY System Enrollment Projections

In 2007, the SUNY System developed institution-specific enrollment projections for years 2008 to 2025. The projections were prepared prior to the economic collapse of 2008, which will likely skew the findings. System projections for SUNY Geneseo indicate a stable enrollment of around 5,200 FTE students until 2014, when enrollment is expected to jump to 5,563 FTE with a steady increase to 5,900 FTE by 2023. The projected enrollment levels at the identified milestones are as follows:

- 2010 Projection – 5,200 FTE
- 2013 Projection – 5,200 FTE
- 2018 Projection – 5,764 FTE
- 2023 Projection – 5,904 FTE

This projection represents an increase of 704 FTE students, or 13.5 percent, between 2009 and 2023 – a very high growth rate.

## College Projections

Enrollment projections were also developed by the College and provided to the consultants. Geneseo's enrollment projections estimated undergraduate and graduate FTE levels for 2010, 2015, 2020, and 2025. To reduce the student-to-faculty ratio, Geneseo would like to decrease and stabilize undergraduate enrollment at 5,000 FTE students from its current level of 5,291 FTE. The College would also like to increase the number of graduate students by 180 FTE between 2009 and 2023 to accommodate new degree requirements for secondary school teachers and accounting majors, which require a four-year specialization in a subject area, followed by a one-year post graduate degree. The projected enrollment levels at the identified milestones are as follows:

GENESEO ENROLLMENT PROJECTIONS	2010 FTE	2015 FTE	2020 FTE	2025 FTE
Undergraduate	5,291	5,000	5,000	5,000
Graduate	119	130	230	300
<b>TOTAL</b>	<b>5,410</b>	<b>5,130</b>	<b>5,230</b>	<b>5,300</b>

These projections suggest an overall FTE decrease of approximately 110 FTE, or two percent, between 2010 and 2025.

## Demographics

A demographic analysis was prepared to complement the enrollment projections from the SUNY System and the College. Approximately 96 percent of its students are from counties within New York State. The Office of Institutional Research at SUNY Geneseo provided the geographic origin, by county, of its in-state student population in 2008. This information was cast against the number of college-age students from the same counties to generate a market share factor, or participation rate. U.S. Census data was used to generate the overall number of college-age students from individual counties. U.S. Census data also reveals the number of college-age students in the subsequent cohort, who effectively represent the future college-age population, and applied the same participation rate to the counties. If SUNY Geneseo continues to draw from the same geographic locations, and retains the same percentage of its student body from those locations, then enrollment will shrink from 5,135 to 4,945 students, a decrease of 190 students, or 3.7 percent of the student body.

## Consensus

The demographic analysis suggests a trend that contradicts the aggressive growth projected by the SUNY System. The consultant team, in agreement with the President's Cabinet, decided that the College's enrollment projections should serve as the foundation for determining future enrollment projections. Consequently, undergraduate FTE should gradually decrease to 5,000 FTE and graduate enrollment should increase by 180 FTE. Faculty FTE should strive to achieve Geneseo's desired student-to-faculty ratio of 14:1.

## Tabular Summary of Enrollment Projections

Based upon the direction and consensus achieved with the Presidents Cabinet, the following enrollment projections were made by department for the current year (2009), 2013, 2018, and 2023. Student FTE figures were derived from the course schedule and are based upon credit hours. FTE enrollment figures do not represent the number of majors within each department, but rather, they are based upon actual credit hours and represent the tangible demand for each department. This method illustrates departmental demand not accounted for within the number of majors, and captures the demand generated by students who have not declared a major. Using the number of majors in each department as the basis for FTE figures underestimates the actual FTE demand for courses.

The FTE is calculated by dividing the total credit hours of courses in each department by 15 for undergraduate students and twelve for graduate students, since a full time undergraduate course load is 15 credit hours per term and a full time graduate course load is twelve credit hours per term. The Departments were selected to align with the Chart of Accounts. Faculty FTE data was provided by the Office of Institutional Research. FTE Projections for students and faculty for 2013, 2018, and 2023 are provided below.

### Students

The following tables document the current FTE enrollments by department and project future FTE enrollments. Geneseo currently has approximately 70 (69.1) FTE graduate students, and anticipates that the Masters in Accounting program will grow by 30 FTE, and that the Masters in Education program will increase by 150 FTE students. This will amount to a total of approximately 250 graduate FTE students in 2023.

The increase in the Masters in Education program represents a shift in the organizational structure of its Education program. Geneseo would like to switch its five-year combined Bachelors and Masters program to a one-year Master's program for its secondary education students. This would enable Secondary Education students to build a deeper background within their chosen subject areas. The School of Education currently enrolls 270 undergraduate majors and 43 graduate majors. The shift in program suggests that the 150 FTE Undergraduate Education majors will be reallocated to other departments at SUNY Geneseo where they will earn their primary undergraduate degrees. These departments are English, Foreign Language, Biology, Chemistry, Math, Physics, and History. For the purposes of this projection these students were allocated to the other departments proportionally according to the number of undergraduates those departments currently enroll. The remaining 120 undergraduate students pursuing roles in primary education will remain in the School of Education for their undergraduate degrees. Enrollment projections up to 2023 were calculated using these shifted enrollments.

After reallocating secondary education students into their subject areas, overall undergraduate enrollment levels were incrementally reduced to achieve the desired student enrollment level of 5,000 FTE by 2023. Undergraduate students include both Lower Division and Upper Division students as listed below:

LOWER DIVISION	CURRENT	2013 FTE	2018 FTE	2023 FTE
School of Business	277.2	273.10	269.00	264.90
School of Education	118.1	95.52	72.93	50.35
Art	191.1	188.27	185.45	182.62
Drama	4.4	4.33	4.27	4.20

<b>TOTAL</b>	<b>69.1</b>	<b>129.1</b>	<b>189.1</b>	<b>249.1</b>

### Faculty

The following table documents the current and future faculty FTE figures. Faculty projections preserve the existing variations in student-to-faculty ratios across departments, and are designed to achieve the overall average target student-to-faculty ratio of 14:1 by 2023. The number of faculty in 2013, 2018, and 2023 gradually increases to reduce the student-to-faculty ratios to 16:1, 15:1, and 14:1 respectively.

<b>FACULTY</b>	<b>CURRENT</b>	<b>2013 FTE</b>	<b>2018 FTE</b>	<b>2023 FTE</b>
School of Business	21.3	25.2	27.0	29.1
School of Education	25.3	29.6	31.4	33.5
Art	14.3	16.6	17.4	18.4
Drama	2.3	2.7	2.8	3.0
Performing Arts	15.0	17.4	18.3	19.3
English	24.3	28.6	30.6	32.8
Foreign Language	13.3	15.7	16.8	18.0
Philosophy	8.7	10.0	10.5	11.1
Biology	18.7	21.7	22.9	24.3
Chemistry	11.3	13.2	14.0	14.8
Computer Science	6.3	7.3	7.7	8.1
Geological Sciences	6.3	7.3	7.7	8.1
Mathematics	19.7	23.5	25.5	27.8
Physics	8.0	9.4	10.0	10.7

History	16.7	20.5	22.9	25.5
Political Science	9.3	10.8	11.4	12.0
Psychology	17.3	20.1	21.1	22.3
Sociology	11.0	12.7	13.4	14.1
Communication	8.7	10.0	10.6	11.1
Communicative Disorders and Sciences	9.3	10.8	11.4	12.0
<b>TOTAL</b>	<b>281.7</b>	<b>330.3</b>	<b>351.1</b>	<b>374.9</b>

### Department Trends within Projections

The following table documents the percent change projected in undergraduate FTE enrollments between 2009 and 2023. The most significant enrollment change occurs within the School of Education, which decreases by 57 percent. This results from the reallocation of secondary education students from the School of Education into the departments associated with their subject areas. The shift into the individual departments also accounts for the slight increases in FTE enrollments in the Foreign Language, Mathematics, and History departments. The general three to four percent decrease within the remaining departments is associated with the desire to decrease overall enrollment levels to 5,000 FTE by 2023.

At the graduate level, projected enrollments within the School of Education increase by 346 percent between 2009 and 2023, which accounts for the additional 150 FTE students enrolled in the one-year Masters in Education program. The 30 additional Masters in Accounting students is a 333 percent increase in FTE enrollment. In December of 2010, Geneseo decided to discontinue the Communicative Disorders and Sciences program.

UNDERGRADUATE DEPARTMENTS	% CHANGE FROM 2009 TO 2023
School of Business	-4%
School of Education	-57%
Art	-4%
Drama	-4%
Performing Arts	-4%
English	0%
Foreign Language	1%
Philosophy	-4%
Biology	-3%
Chemistry	-3%
Computer Science	-4%
Geological Sciences	-4%
Mathematics	5%
Physics	-1%

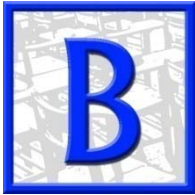

Anthropology	-4%
Geography	-4%
History	14%
Political Science	-4%
Psychology	-4%
Sociology	-4%
Communication	-4%
Communicative Disorders and Sciences	-4%

GRADUATE DEPARTMENTS	% CHANGE
School of Business	333%
School of Education	346%
Communicative Disorders and Sciences	0%

### **FTE Increases or Decreases within Projections**

Overall, the number of undergraduate students decreases from 5,233 FTE in 2009 to 5,000 FTE in 2023, or a decrease of 4.5 percent. Overall graduate enrollments increase from approximately 70 to 250 FTE, or an increase of 260 percent. In terms of faculty FTE, total faculty FTE increases by 93 FTE, or 33 percent, between 2009 and 2023, to 375 FTE. This reduces the undergraduate student-to-faculty ratio to 13.3 to 1, and the overall student-to-faculty ratio to 14 to 1.

## Space Guidelines

In general, the space guidelines provided by SUNY were developed more than fifty years ago, before the advent of modern technology in higher education, and before changes in pedagogy. The salient feature of these guidelines was that they were derived from a literal interpretation of the significance of the Carnegie credit unit, which suggested that seat-time in

labs or classrooms could be used as a primary yardstick for learning. Other underlying drivers of the guidelines are the assumptions that buildings (e.g. libraries or student centers) have discrete rather than overlapping functions, that scholarly work undertaken by either faculty or students is a solitary activity; and that guidelines are intended to justify expansion rather to provide incentives for efficiency. Today's emphasis on sustainability and fiscal constraint suggests a different approach may be required.

Specific observations are as follows:

- Overall, the use of 15 distinct space categories is probably too many to be useful. By way of comparison, HEGIS codes (which are also in need of revision) are limited to nine categories. The SUNY guidelines include categories where the standard is, essentially, whatever the institution has. These categories should probably be eliminated. Guidelines for inclusion in a particular category are also insufficient, leading to apparent random assignment in the PSI in some cases.
- Documentation of the guidelines is limited and frequently confusing. Information on the guidelines and their relationship to the PSI is not available in a single coherent document.
- There should be a better connection between the space codes in the PSI and the 15 required space categories. At the very least, the PSI should identify the 15 space categories as a field.
- Utilization rates for classrooms/lecture halls and class laboratories are unrealistic, and far exceed typical standards in other states. They also do not appear to have been enforced. The utilization requirements for classrooms, with the Budget Office requirements of an 18 percent increase over the 75 percent standard, would essentially require that all classrooms are in use all the time throughout the day, after class change time is accounted for.
- Seat fill requirements for classrooms are also very high. The ability to achieve these seat fill requirements would require a very close match between the distribution of class section enrollments and the distribution of classroom seating capacities. In general, the classroom standards do not reflect the realities of teaching and scheduling. (This is not to say that colleges cannot achieve far greater efficiency in the use of instructional space, for example by making better use of early mornings and Fridays.)
- The requirement that classroom space needs should be projected at the departmental level does not reflect the fact that efficiency of classroom use is best achieved by central scheduling from the Registrar's office. It would be more useful to project classroom needs in the aggregate.
- The current standards use different methodologies to calculate office space requirements for faculty and administration. While the calculation for faculty office

space is driven by faculty full-time-equivalent (FTE) employees, administrative work space is calculated as a function of student enrollment. Rapid growth in the relative size of non-teaching administrative staff has been a significant feature of higher education in the past thirty years. While the SUNY formula could be seen as a progressive strategy to provide an incentive for limiting administrative space, it does not reflect current practice. Current research, which has revealed the significant role effective non-teaching services play in student success, suggests that this standard should be revisited.

- Library space standards reflect traditional notions of a print-based library with the library serving as a physical portal to knowledge. Today's library serves as a forum for technology-based access to knowledge, group study as well as individual study, and instruction in the use of digital information. The functions of the library spread beyond its walls. The standards do not reflect the need for informal study space outside the walls of the library, nor do they take into account ADA guidelines which factor in shelf density.
- There is no effective formula for determining Research and Individual Study Lab space requirements. According to the SUNY guideline, research space needs are driven by student contact hours, but no record of research or individual study is typically kept. With increased emphasis on the value of engaging students in research, provision should be made for calculating this space requirement.
- Athletic space should be projected in an *a la carte* manner that speaks to the specific facility needs of the institution.
- Category 2.5 General and Special Use relies upon a percentage factor that varies by department. To ensure alignment with SUNY standards that information should be included as part of the general guidelines.

## Alternative Guidelines and Standards

In general, many space standards in use in various state systems around the country are obsolete and not enforced. Very rapid changes in technology, pedagogy, the role of libraries, and changing student and faculty expectations have made it challenging for states to respond appropriately or in a timely fashion. In addition, the recent pressure on capital budgets in public institutions, following an almost unprecedented construction boom, coupled with a growing commitment in higher education to sustainability, have suggested that space standards can be re-engineered to serve a different and more up-to-date set of purposes. Ideally, space standards will be combined with other data and metrics to improve educational quality, promote efficiency, lower operating costs, and reduce carbon footprint. A synthesis of data sets can be used to develop a rational and transparent capital allocation strategy across the SUNY System, incorporating considerations such as the type of institution, enrollment capacity, deferred maintenance liability, showcased or experimental academic programs, and the relative cost of real estate.

The essential characteristics of any system-wide space management system are that it be both usable and used. While standards or guidelines need to be flexible and comprehensible, the system that tracks space use must be an effective visualization tool so that it encourages leadership and administrators to think in new ways about system-wide strategic issues.

While existing space standards inevitably have limitations, the consultant team has relied on the Council of Educational Facilities Planners International (CEFPI), Pennsylvania State System Higher Education Guidelines, and the Texas Higher Education Coordinating Board in developing their own standards. Specific suggestions for space standards relating to particular space types are incorporated in the report below.

## **Space Use/Existing Space**

### **Assessment of Physical Space Inventory Process**

The assessment of space need phase of the Facilities Master Plan requires that space needs be generated for fifteen predetermined categories identified by the SUNY System. Space needs projections for each category are then compared to the amount of existing space documented within the College's Physical Space Inventory, or PSI, for the same category. The fifteen categories are the following:

#### **Instructional and Departmental Spaces**

- 1.1 Classrooms
- 1.2 Lecture Halls
- 2.1 Instructional Labs and Support
- 2.2 Individual Study
- 2.3 Research and Support
- 2.4 Faculty Offices and Service
- 2.5 General and Special Use

#### **Campus Support Spaces**

- 3.0 Health and Physical Education (HPE)
- 4.0 Data and Resources Center (IT)
- 5.0 Organized Activity
- 6.0 Organized Research
- 7.0 Public Service
- 8.0 Assembly and Exhibition Space
- 9.0 Library
- 10.0 Student/Faculty Activity
- 11.0 Student Health Services
- 12.0 General Administration
- 13.0 Central Services
- 14.0 Building Services
- 15.0 Inactive Space

As part of the master planning process, the consultants walked through a sample of buildings to review the accuracy and validity of the 2009 Physical Space Inventory provided by the State University Construction Fund. Overall, it was determined that the PSI accurately reflects the existing space on campus. Using Sasaki's in-house software, the PSI was then combined with the College's current AutoCAD files to ensure that they align in terms of square footage recorded in the PSI and identified in the AutoCAD files. The software indicates the level of error between the two files. For Geneseo, the PSI and AutoCAD files aligned and generated a negligible amount of error, which suggests that the PSI successfully documents the existing space on campus.

### **Usability and Appropriateness of Space**

The suitability of a broad cross-section of buildings has been described in detail in Section K of the Phase II Report. Additional comments are provided in this section for a representative sample of buildings.

Welles Hall is one of the more classical collegiate buildings on the campus, and has inherent flexibility as an academic building, having been built originally as a classroom building, with generous punched-window fenestration, broad spans, and high ceilings. Predominantly a classroom building, it serves its purpose well, and its original architectural qualities have been minimally compromised. Because there is a surplus of instructional space on the campus, parts of the building could usefully be repurposed to support conventional classrooms with informal learning spaces, which are generally in short supply on the campus.

Sturges Hall, which is the College's other main classroom building, is architecturally less satisfying, and many of its larger classrooms seem inappropriately scaled to meet today's needs. The introduction of new mechanical systems and dropped ceilings has changed the character of spaces in the building, blocking the top level of windows in most rooms. This building could benefit from significant rethinking to turn it into a more flexible and attractive learning environment.

Completion of the Integrated Science Center provided the College with an abundance of lab space. The building occupies a commanding position on the campus, and its open and light-filled spaces provide a powerful invitation to students to get involved in science. The ample space the building has provided will serve the College well as faculty members increasingly expect undergraduates to become involved in research projects.

Brodie Hall serves the needs of the arts on campus. A classic of its Brutalist period, it includes two theaters, numerous studios, and a gallery. While its aesthetic may not be to today's taste, with its dark corridors and limited fenestration except for the studios, it is very much a purpose-built structure, and not easily adapted.

The large McVittie Union is located in the lower campus, and major grade changes separate it from the academic core and the library. It is, however, well aligned with the two major concentrations of residential life. The ballroom is the largest space in the building but is only used for organized events. Much of the remaining student space is laid out along double-loaded corridors, which belies the potential openness of the building structure. Overall, the building lacks flexibility or a feeling of transparency and welcome and could benefit from a significant upgrade.

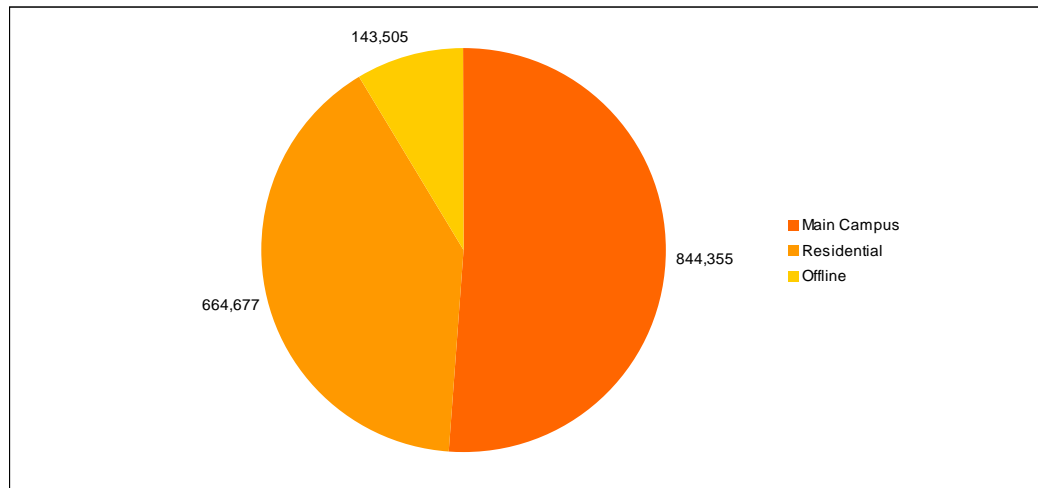

Among nonresidential buildings, the Milne Library is critical to the academic success of the College, and is probably the building most in need of change. The role of libraries has changed and expanded considerably since the Milne Library was constructed, and the library staff has worked hard to adjust the building to new needs. However, it is clearly undersized and does not relate well to the other academic buildings in its vicinity. An addition based on good urban design principles and reflecting today's pedagogy, in addition to internal changes, will do much to enhance the overall academic quality of the College.

## Tabular Summary of Existing Space Campus Breakdown

The campus contains approximately 1,650,000 sf of assignable space on campus, which is broken down into three categories: Main Campus, Offline, and Residential. Main Campus space includes all assignable spaces in non-residential buildings. The new building programs for the Bailey Science Building and Doty Hall, which were provided as separate documents, have been incorporated within the Main Campus calculations. Offline facilities include assignable spaces within the Holcomb Learning Center and the existing Bailey Science Building, as recorded in the PSI. Residential space includes all spaces within the residence halls and 41,310 asf of residential dining facilities.

CAMPUS BREAKDOWN	ASF	Percent
Main Campus	844,355	51.1%
Residential	664,677	40.2%
Offline	143,505	8.6%
<b>TOTAL</b>	<b>1,652,537</b>	<b>100%</b>

**All Campus Locations – Aggregate Space Use**

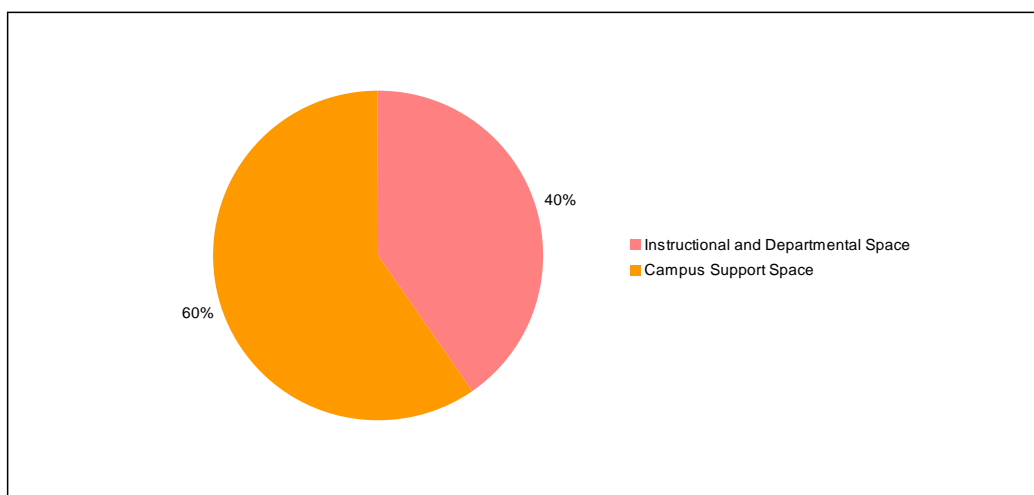

Source: Physical Space Inventory (PSI)

## Main Buildings

### Space Type

The following section organizes the Main Campus space according to the fifteen SUNY space categories previously listed. Approximately 40 percent of assignable space on the Main Campus is classified within the instructional and departmental space categories. The remaining 60 percent of assignable space is associated with campus support spaces.

SUNY CATEGORIES	ASF	Percent
Instructional and Departmental Space	339,784	40.0%
Campus Support Space	504,571	60.0%
<b>TOTAL</b>	<b>844,355</b>	<b>100%</b>

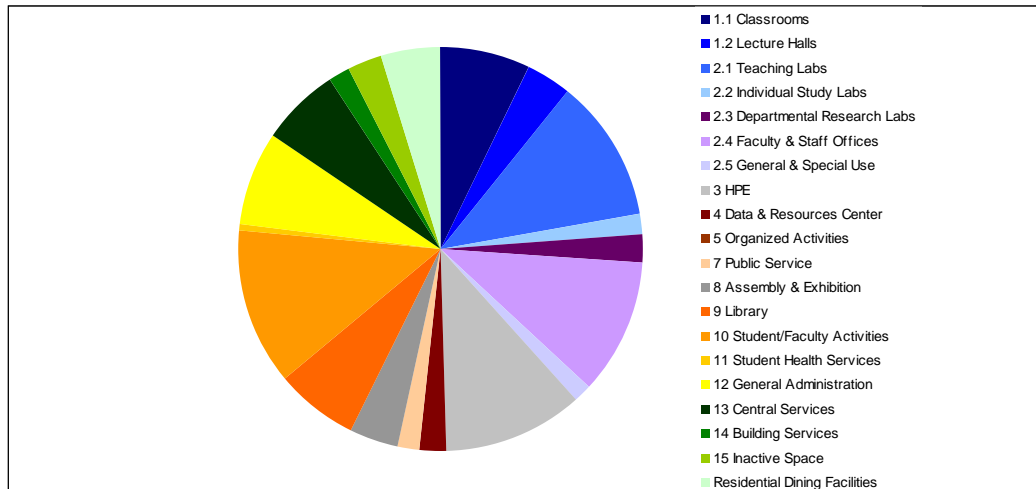

### On-Campus Buildings – Aggregate Space Use

Source: Physical Space Inventory (PSI)

With regard to the fifteen individual categories, twelve percent of total assignable space – 110,319 asf – is classified as student/faculty activity space. Instructional labs, faculty and staff offices, and HPE are second to student/faculty activity space and comprise eleven percent of total space each. General administration and classroom space each account for seven percent of total assignable square feet on campus.

MAIN CAMPUS SPACE TYPE	ASF	Percent
1.1 Classrooms	64,719	7%
1.2 Lecture Halls	30,563	3%
2.1 Instructional Labs and Support	100,823	11%
2.2 Individual Study	14,833	2%
2.3 Research and Support	20,443	2%
2.4 Faculty Offices and Service	96,737	11%
2.5 General and Special Use	11,666	1%
3.0 Health and Physical Education (HPE)	97,733	11%
4.0 Data and Resources Center (IT)	20,287	2%
5.0 Organized Activity	688	0.1%
6.0 Organized Research	0	0%
7.0 Public Service	14,596	2%

#### On-Campus Buildings – Aggregate Space Use

Source: Physical Space Inventory (PSI)

## **Department**

Assignable space on the Main Campus was also classified by department. According to the 2009 Physical Space Inventory, over 88 separate departments occupy space on campus. The complete list of departments and associated amount of assignable space is provided in the Appendix. Of the 88 departments, "Health and Physical Education" occupies 15.2 percent of on-campus space. "Instruction General" follows with 8.9 percent of space on the Main Campus, or 78,743 asf.

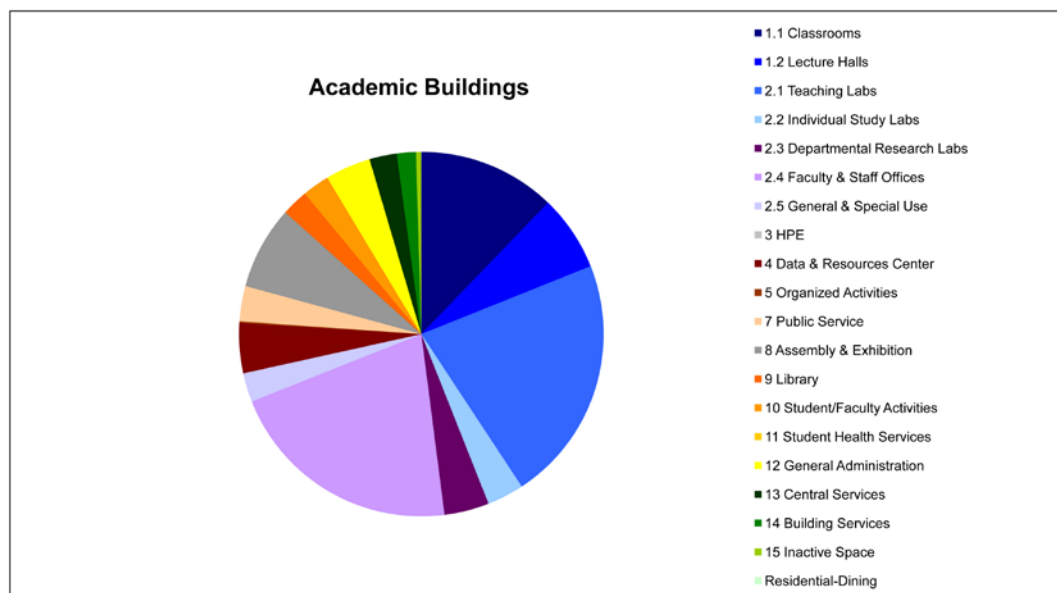

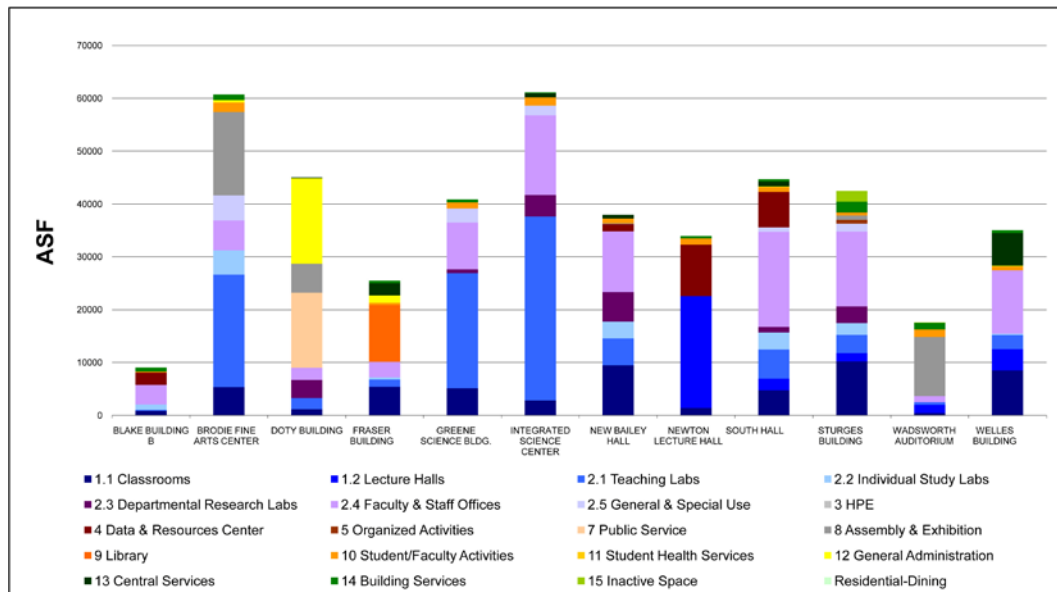

## **Individual Building Analysis**

The following section documents the space uses within each building according to the fifteen SUNY space categories. Rather than analyze each building separately (which is included in the Appendix), the main buildings on campus have been grouped according to predominant building function, including academic buildings, administrative buildings, athletic and recreation buildings, student-focused buildings, and support/service buildings. Although technically not one of SUNY's 15 space categories, residential dining has been included in the assessment of student focused buildings since residential dining centers serve the total student and faculty population, and were coded in the PSI as within 'academic' buildings.

## **Academic Buildings**

SUNY Geneseo has twelve main academic buildings: Blake Building B, the Brodie Fine Arts Center, the Doty Building, the Fraser Building, the Greene Science Center, the Integrated Science Center, New Bailey Hall, Newton Lecture Hall, South Hall, the Sturges Building, Wadsworth Auditorium, and the Welles Building. The total amount of space in these buildings approaches 454,000 assignable square feet. Each building contains a variety of uses. Faculty office and support space as well as classroom space are consistent among all primary academic buildings. Newton Lecture Hall is the most specialized building, and is primarily (62 percent, or 21,168 asf) dedicated to lecture hall space, and also contains a significant amount of space assigned to space type 4.0 Data and Resources Center (almost 30 percent, or 9,727 Square feet). The majority of library space on campus is within the Milne Library, but almost 11,000 square feet of library space is also contained in the Fraser Building. The Greenhouse, not included within the building analysis, also contributes an additional 2,435 asf of departmental research space.

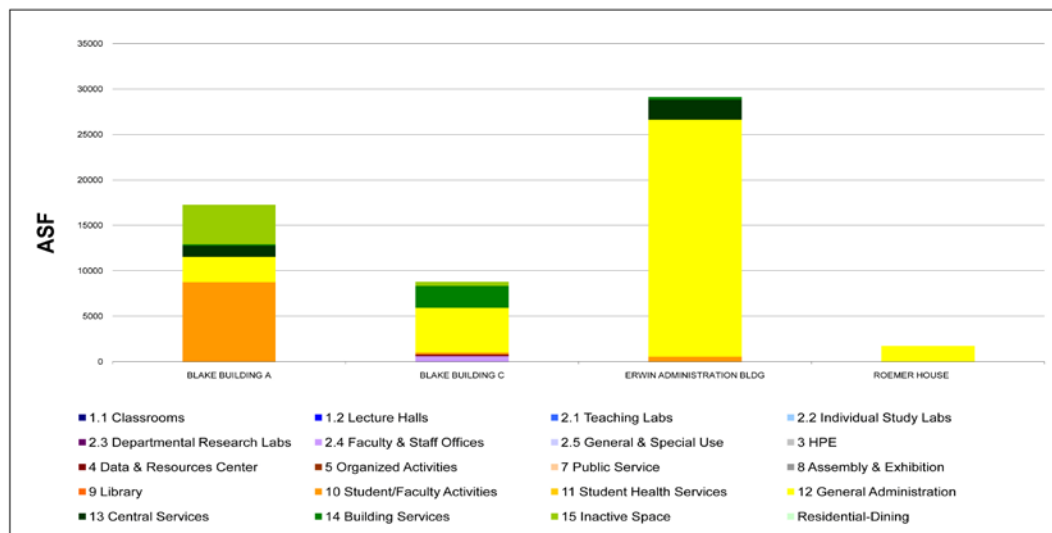

In aggregate, approximately 22 percent of space in the academic buildings is occupied by teaching labs, followed closely by faculty and staff offices at 21 percent. Classrooms occupy twelve percent of the space in academic buildings, while seven percent is allotted to both lecture halls, health, assembly and exhibition space. No other use occupies more than four percent of the total academic building space.

<b>ACADEMIC BUILDINGS</b>	<b>ASF</b>	<b>Percent</b>
1.1 Classrooms	55,392	12%
1.2 Lecture Halls	30,563	7%
2.1 Instructional Labs and Support	98,982	22%
2.2 Individual Study	14,833	3%
2.3 Research and Support	18,008	4%
2.4 Faculty Offices and Service	95,342	21%
2.5 General and Special Use	11,666	3%
4.0 Data and Resources Center (IT)	20,089	4%
5.0 Organized Activity	688	<1%
7.0 Public Service	14,231	3%
8.0 Assembly and Exhibition Space	33,438	7%
9.0 Library	10,708	2%
10.0 Student/Faculty Activity	10,893	2%
12.0 General Administration	18,289	4%
13.0 Central Services	11,046	2%
14.0 Building Services	7,673	2%
15.0 Inactive Space	2,115	<1%
<b>TOTAL</b>	<b>453,956</b>	<b>100%</b>

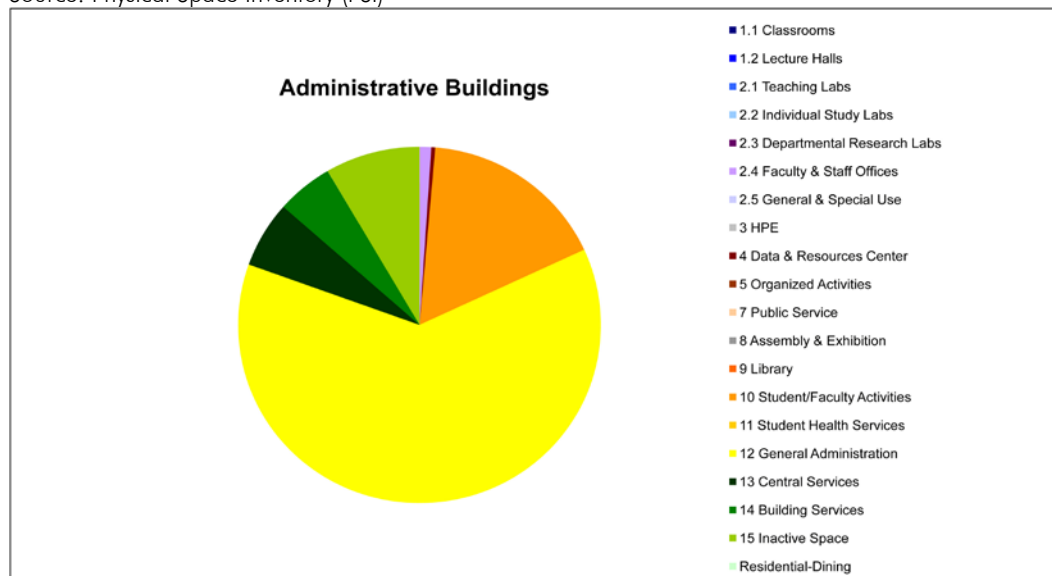

## Administrative Buildings

SUNY Geneseo has four administrative buildings including Blake Building A, Blake Building C, the Erwin Administrative Building, and the Roemer House. These buildings contain nearly 56,889 square feet of assignable space. The majority of assignable space in these buildings – 35,508 asf – is dedicated to general administration (62 percent), while 17 percent of the space is assigned to student and faculty activities. Eight percent of the administrative buildings is inactive, including 4,364 square feet in Blake Building A, and 444 square feet of inactive space is in Blake Building C. The Erwin Administration Building is the largest of the three. Ninety percent of this facility is classified as general administration space. Other uses in the administrative buildings include faculty and staff offices, data and resources, student/faculty activities, central services, and building services.

<b>TOTAL</b>	<b>56,889</b>	<b>100%</b>

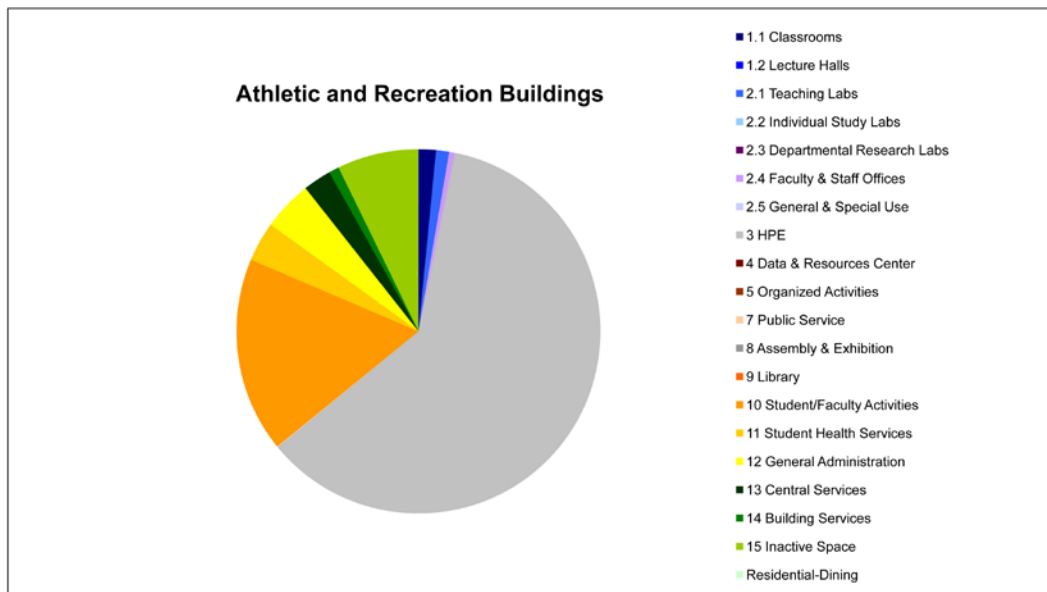

## Athletic and Recreation Buildings

The Lauderdale Health Center, Merritt Athletic Center, and the Schrader Health and Physical Education Building are the primary facilities that focus on physical education and health. In total, they contain nearly 159,000 assignable square feet of athletic, recreation, and health space. The Merritt Athletic Center is the largest of the three facilities, and includes nearly 95,000 asf of space, 79 percent (74,518 asf) of which is classified as HPE space. An additional 22,000 asf of HPE space is located within the Schrader Health and Physical Education Building. Both Schrader and the Merritt Athletic Center also include faculty and staff offices, general administration space, as well as space for student/faculty activities. Schrader also includes approximately 2,500 asf of classroom space and 1,850 asf of instructional labs. All space assigned to student health services – 5,597 asf – is located within the Lauderdale Health Center.

<b>TOTAL</b>	<b>158,764</b>	<b>100%</b>

## Student-Focused Buildings

The McVittie Union and the Milne Library are the two major student-focused buildings on campus and are complemented by a series of student dining centers that also provide student and faculty focused services. The student dining centers include Letchworth Dining Hall, Mary Jemison Dining Hall, and the Red Jacket Dining Hall. Collectively, these buildings provide approximately 176,300 asf of student-focused space on campus. Of the total area, the dining halls account for approximately 23 percent of space, or 41,310 asf. The McVittie Union is designed as the primary student center. Eighty-nine percent of its assignable square footage – 51,550 asf – is associated with student/faculty activity. The Library functions as the central location for studying on campus, and contains 82 percent of total campus study space. Only 1,946 asf of the library is classified as student/faculty activity space, yet it is one of the most successful student life spaces on campus.

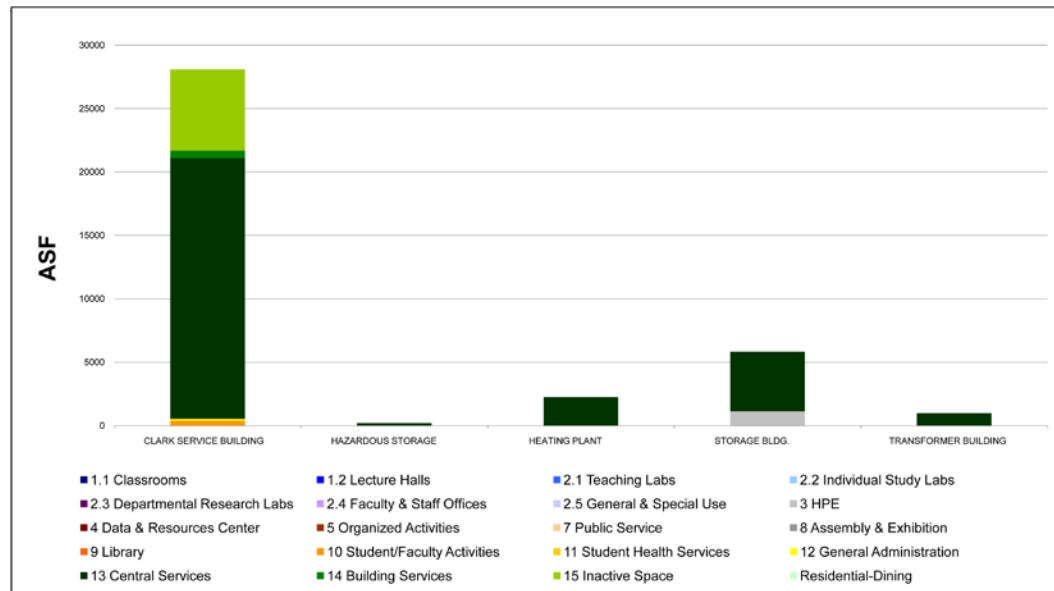

**Student Focused Buildings – Aggregate Space Use**

Source: Physical Space Inventory (PSI)

STUDENT FOCUSED BUILDINGS	ASF	Percent
1.1 Classrooms	6,874	4%
7.0 Public Service	250	0%
8.0 Assembly and Exhibition Space	312	0%
9.0 Library	48,855	28%
10.0 Student/Faculty Activity	62,090	35%

14.0 Building Services	3,187	2%
Residential Dining	41,310	23%
<b>TOTAL</b>	<b>176,300</b>	<b>100%</b>

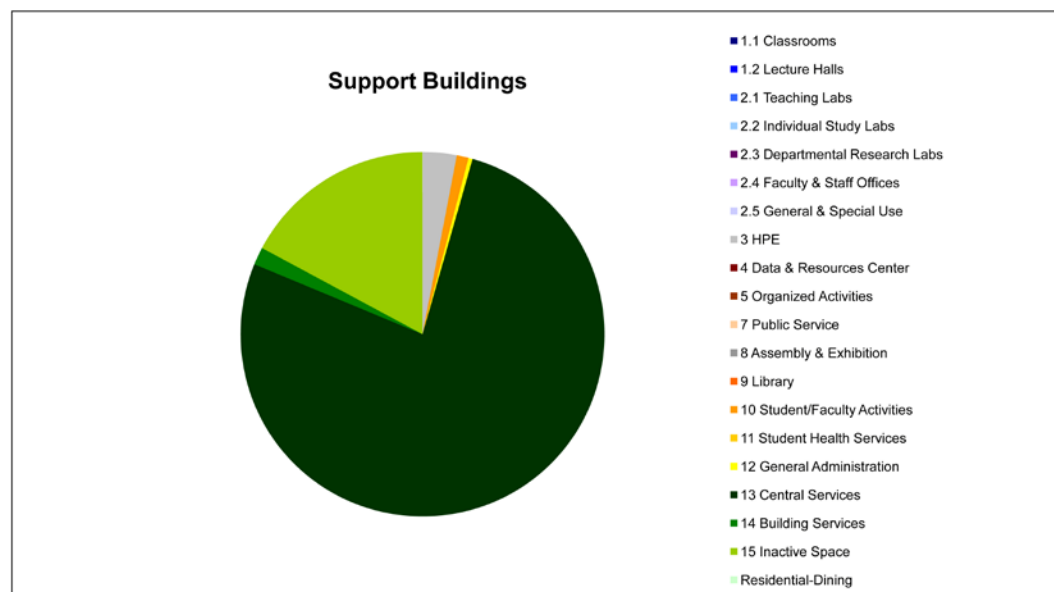

## Support Buildings

Five service buildings support the SUNY Geneseo campus: the Clark Service Building, Hazardous Storage, Heating Plant, Storage Building, and the Transformer Building. Collectively, they provide approximately 37,321 asf of space. Seventy-five percent of this space – 28,081 asf – is located within the Clark Service Building, which contains approximately 20,600 asf of central service space. The remaining four buildings contribute another 8,110 asf of central service space.

## Benchmarking – Existing Space

The following section benchmarks Geneseo's existing assignable space per FTE against comparable peers. The peer institutions were selected based on similar pedagogical approaches to learning, mission, and general enrollment size, and represent both private and public liberal arts colleges. Effort was made to include public institutions that are members of the Council of Public Liberal Arts Colleges (COPLAC). The benchmarking study addresses the following space uses:

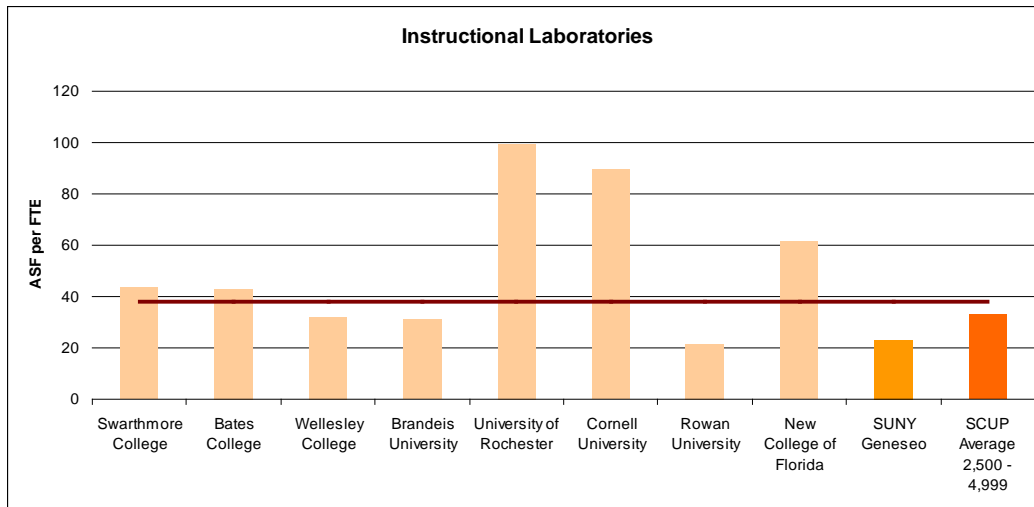

- Classroom Space
- Laboratory Space
- Office Space
- Library and Study Space
- Athletics and Recreation Space
- Student Life Space

### Benchmarking Analysis – Classroom Space

Source: Physical Space Inventory (PSI) and Sasaki Institutional Database

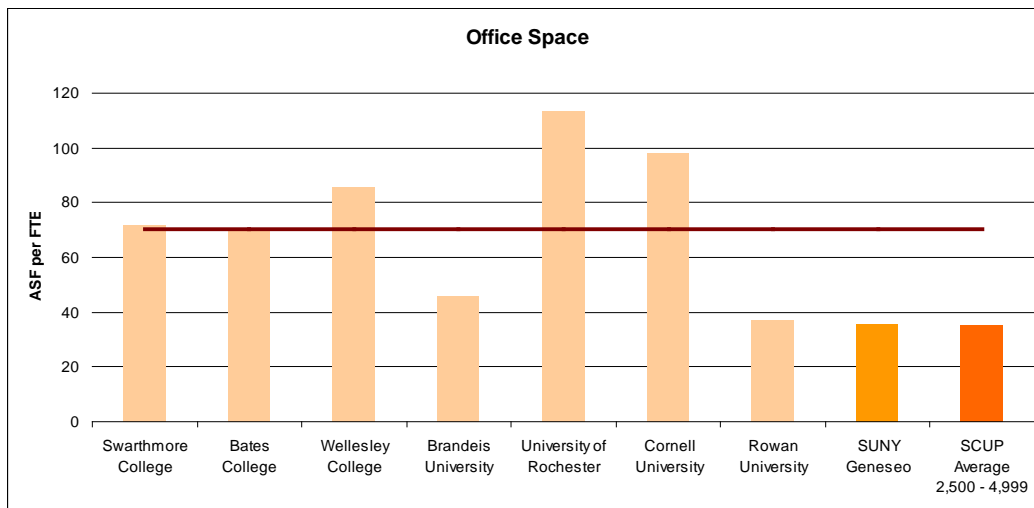

Median —

#### Benchmarking Analysis – Laboratory Space

Median —

#### Benchmarking Analysis – Athletics and Recreation Space

Source: Physical Space Inventory (PSI) and Sasaki Institutional Database

Median —

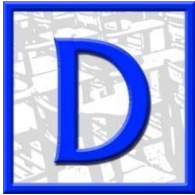

**Benchmarking Analysis – Student Life Space**

Source: Physical Space Inventory (PSI) and Sasaki Institutional Database  
Median

The benchmarking analysis suggests that when compared to private liberal arts institutions with substantial endowments, Geneseo’s existing space per FTE generally falls below the median. However, when compared to public peers, such as Rowan University or the New College of Florida, the amount of existing space per FTE at Geneseo is far more comparable in most categories. Although the analysis is prepared on the basis of space per FTE, many of the private institutions have lower enrollment levels, which may generate a larger space per FTE since institutions still need to build a baseline gym or theater, for example, regardless of enrollment size.

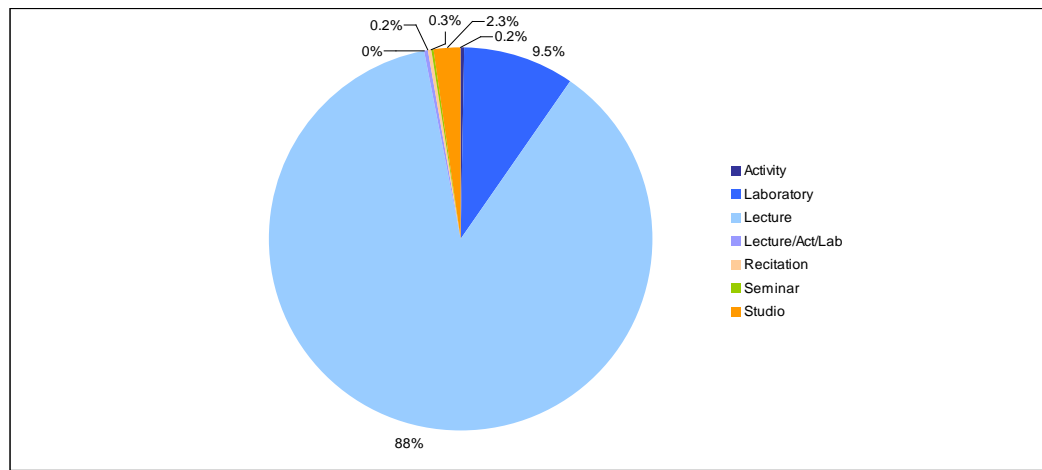

**Graphic Representation of Space**

Color-coded building floor plans are located in the Appendix for buildings with available AutoCAD files. These floor plans graphically represent the space in terms of both space use and department. In addition to the AutoCAD files, stacking diagrams were also prepared that illustrate the buildings in terms of both space use and department. Stacking diagrams exclude non-assignable space and serve as a diagrammatic tool to illustrate how assignable space is used on individual floors.

## Space Utilization Instructional Profile

In the Fall 2009 Course Schedule, 58,256 unique weekly student contact hours (WSCH) are recorded. The following chart depicts the breakdown of courses according to their definition in the Fall 2009 Course Schedule. Of the 58,256 contact hours, 50,838 hours (87.3 percent) are associated with courses identified as lectures. Laboratory and studio courses account for 9.5 and 2.3 percent of contact hours respectively. Courses defined as seminars, recitation, and activity comprise the remaining contact hours.

**Breakdown of Course Types**

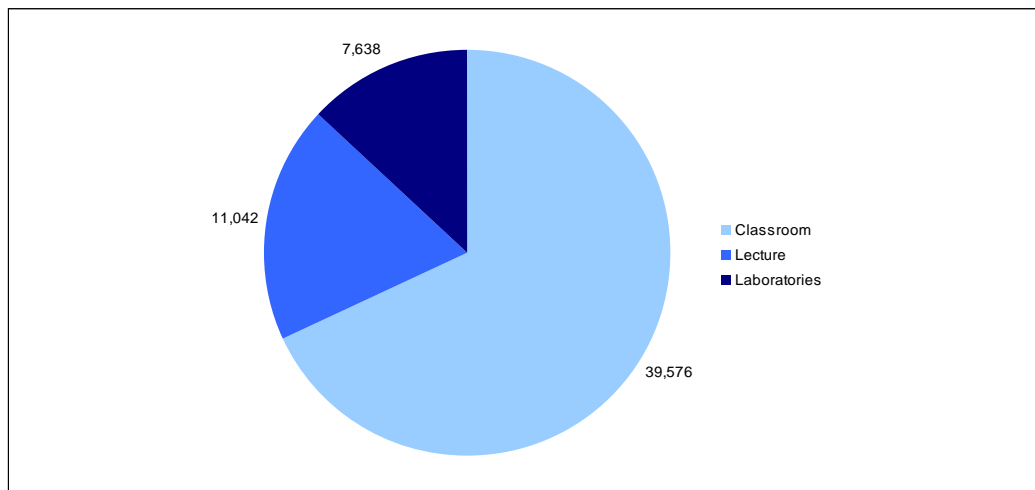

Source: Fall 2009 Course Schedule

BREAKDOWN OF COURSE TYPES	WSCH	Percent
Activity	127	0.2%
Laboratory	5,530	9.5%
Lecture	50,838	87.3%
Lecture/Act/Lab	157	0.3%
Recitation	90	0.2%
Seminar	200	0.3%
Studio	1314	2.3%
<b>TOTAL</b>	<b>58,256</b>	<b>100%</b>

WSCH: weekly student contact hours

Although a course may be defined as a lecture, it does not necessarily require the use of a lecture hall. The following chart translates the 58,256 weekly student contact hours in terms of their demand on instructional spaces. These contact hours represent demand for specific room types and is folded into the subsequent space needs assessment. Classroom demand includes hours from lectures, lecture/lab/activities, seminars, and recitations with enrollments below 60 students. Lecture demand draws

from the same type of courses with 60 or more students. Laboratory demand includes hours from studio, laboratory, and activity courses. Laboratory hours also includes hours that may have been classified as classes or lectures, but require lab space, such as performing arts courses or language labs.

#### Instructional Demand (Contact Hours)

## Methodology for Utilization Rates

The following section analyzes the utilization rates in existing classrooms and lecture halls at SUNY Geneseo. Utilization is based upon the scheduled instruction documented in the 2009 Fall Course Schedule supplied by the Registrar. The analysis omits any duplicate or cross-listed courses, and courses that do not have a room number, start time, or end time associated with them. The analysis determines utilization rates in spaces identified in the Physical Space Inventory (PSI) as classrooms (SUNY code 1001), lecture halls (SUNY code 1100), and class laboratories (SUNY code 1300). The utilization rates at Geneseo are then compared to rates established by the SUNY guidelines and to rates recommended by the consultants.

## Observations on SUNY Target Utilization and Occupancy Rates

SUNY target utilization rates are provided by the SUNY guidelines. The guidelines recommend a room utilization target of 75 percent for classrooms and lecture halls, based on a 40-hour week. The rate for laboratories is 60 percent. In terms of target occupancy rates, SUNY recommends an 80 percent target rate for classrooms and lecture halls, as well as class laboratories.

## Recommended Utilization Rates

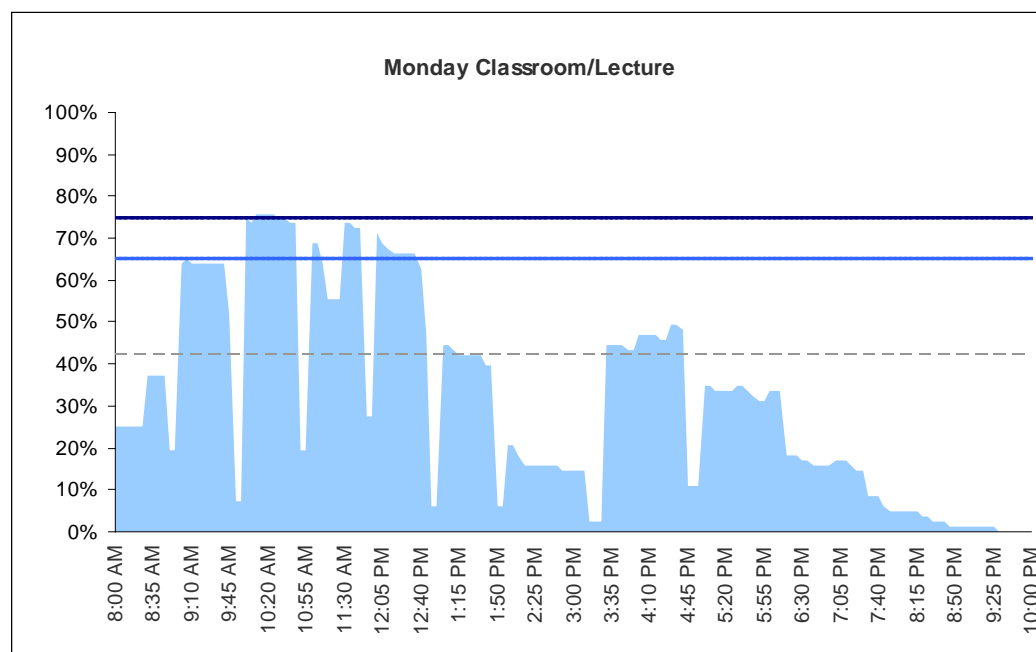

The target occupancy and utilization rates from the SUNY System far exceed typical occupancy and utilization rates for classrooms, lecture halls, and especially laboratories. Based upon experience working with a wide variety of both public and private higher education institutions, typical utilization rates for classrooms and lecture halls hover around 65 percent. It is not uncommon to experience laboratory utilization rates between 25 to 50 percent, depending on the type of laboratory. A utilization rate of 65 percent is usually applied as a target rate for classrooms and lecture halls, and a utilization rate of 35 percent for class laboratories. In terms of station occupancy, a rate of 65 percent is typically applied for classrooms and 70 percent for laboratories. While higher utilization rates are desirable from a cost-effectiveness perspective, they are seldom achievable. In institutions where they are achieved, the learning

environment is typically compromised, with classes and labs being taught in inappropriate spaces.

## Peak Utilization and Occupancy Analysis

### Classroom/Lecture Hall Utilization – Daily Summary

The following charts depict the daily utilization rates for classrooms and lecture halls at SUNY Geneseo. While the charts document scheduled classroom/lecture hall use at any time during the day, the average utilization rate was determined during the peak week, which is defined as Monday through Thursday from 8:00 am until 5:00 pm and Friday from 8:00 am until noon. The charts measure the number of classrooms and lecture halls in use out of the total available classrooms and lecture halls. Assessments were made in five minute increments.

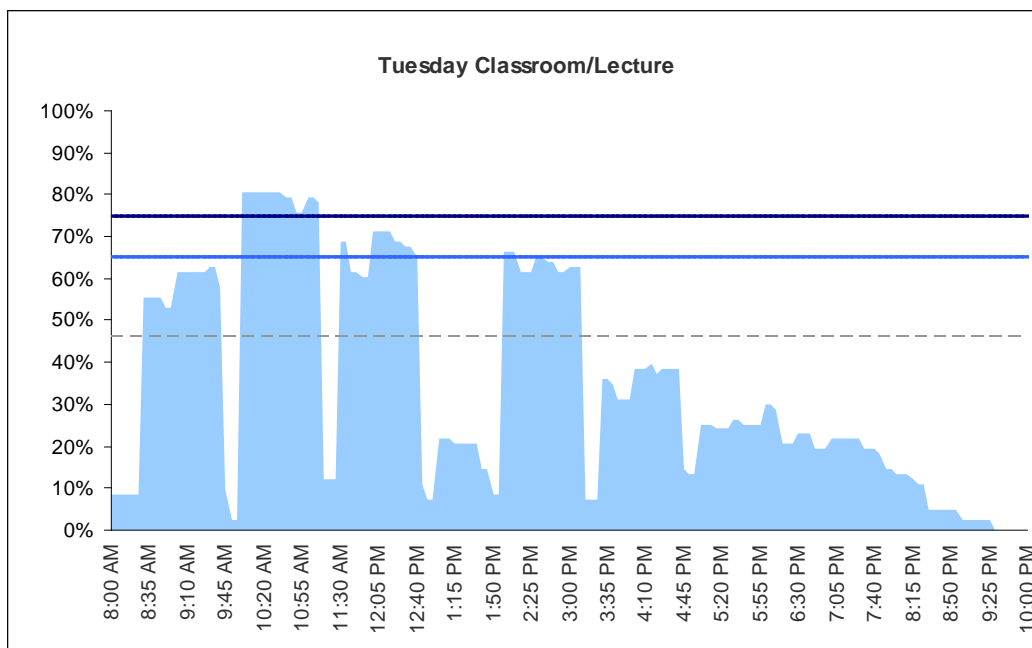

#### Classroom/Lecture Hall Utilization – Monday

Average Rate – 42.1 percent - - - - -

SUNY Target —————

Consultant Target —————

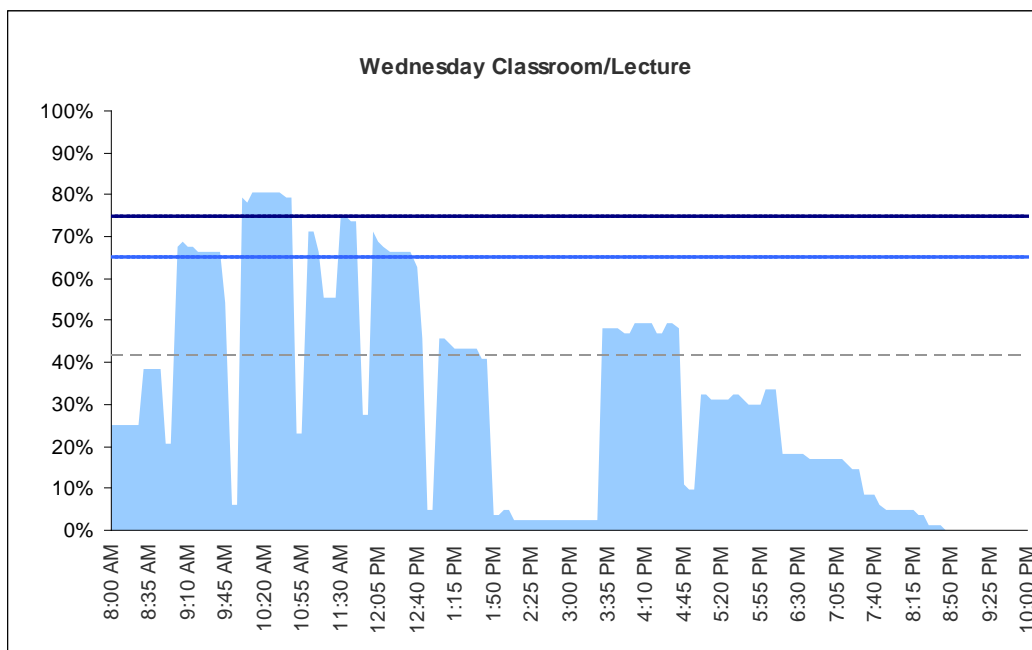

#### Classroom/Lecture Hall Utilization – Tuesday

Average Rate – 46.1 percent - - - - -

SUNY Target —————

Consultant Target —————

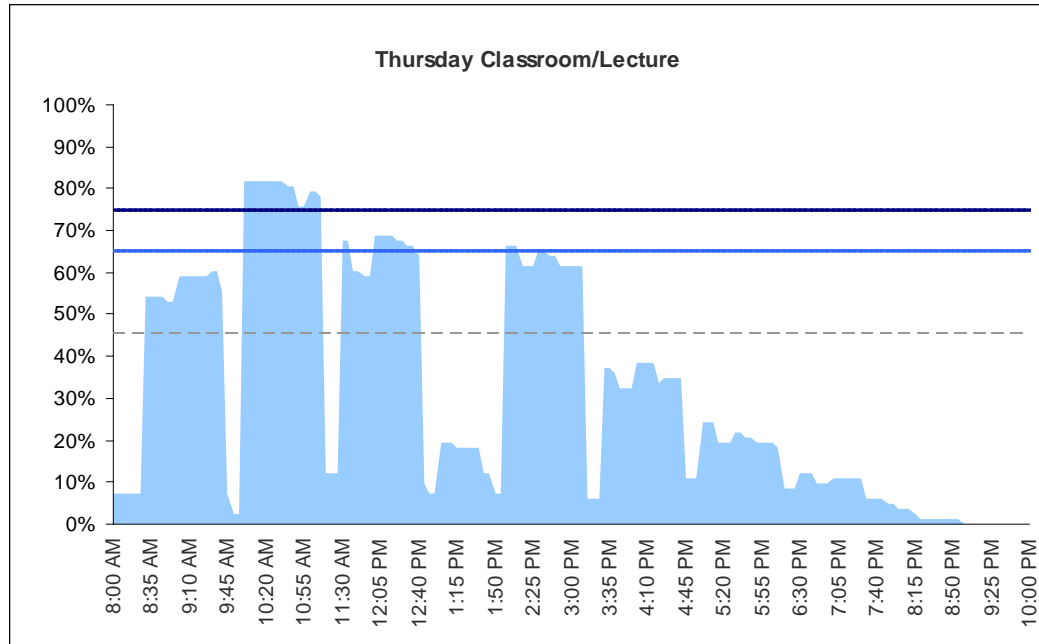

#### Classroom/Lecture Hall Utilization – Wednesday

Average Rate – 41.6 percent - - - - -

SUNY Target —————

Consultant Target —————

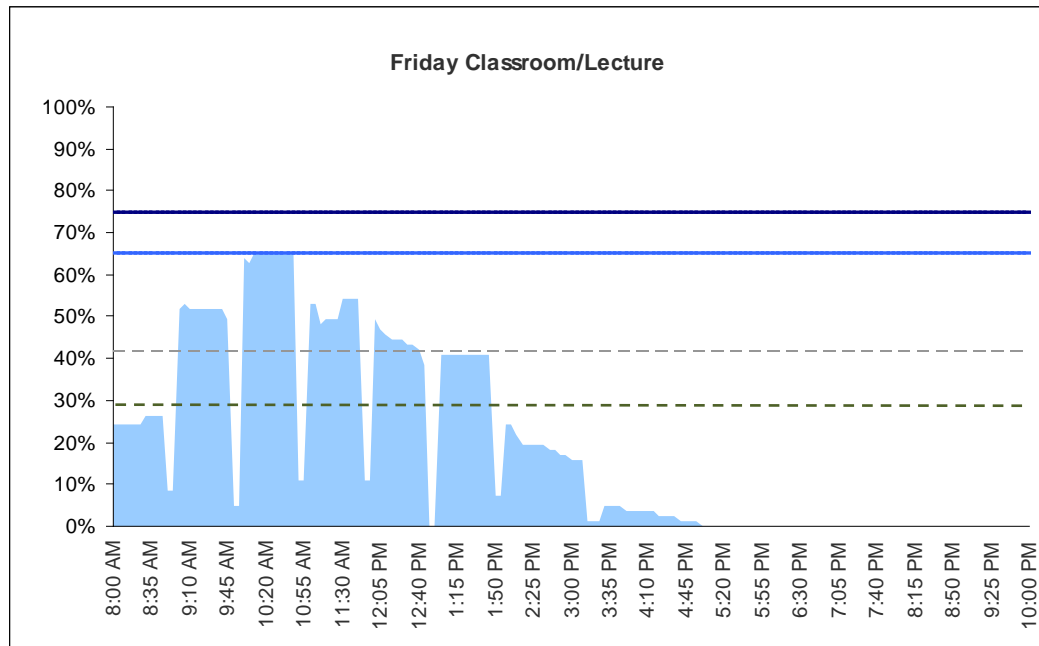

**Classroom/Lecture Hall Utilization – Thursday**

Average Rate – 45.1 percent -----

SUNY Target —————

Consultant Target —————

**Classroom/Lecture Hall Utilization – Friday**

Average Rate – 41.7 percent (8:00 am – Noon) -----

Average Rate – 29.8 percent (8:00 am – 5:00 pm) -----

SUNY Target —————

Consultant Target —————

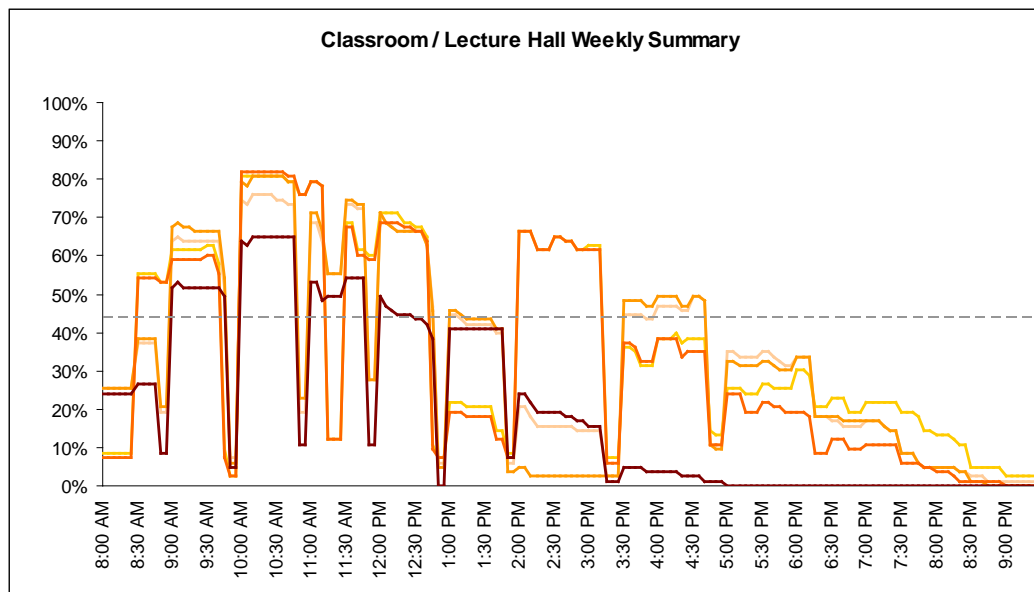

The following table summarizes the daily peak utilization rates:

DAILY AVERAGE UTILIZATION RATE (PEAK)	Percent
Monday	42.1%
Tuesday	46.1%
Wednesday	41.6%
Thursday	45.1%
Friday	41.7%

Overall, classroom/lecture hall utilization rates are well below both the consultant and SUNY target rates of 65 and 75 percent respectively. Utilization levels peak on Mondays and Wednesdays between 10:00 am and 2:00 pm. Average daily room utilization is at its lowest on Friday afternoons, which is common among most higher education institutions. The two typical class length times used by the College (50 minutes and 75 minutes) and liberal policies toward start-times are graphically evident and compound the scheduling complexities. Standardizing the schedule and course start times would go far towards allowing better use of Geneseo's classrooms and labs, ensuring that instructors are more likely to be scheduled in appropriate spaces.

### Classroom/Lecture Hall Utilization – Weekly Summary

The following diagram illustrates the composite utilization summary for Monday, Tuesday, Wednesday, Thursday, and Friday. The weekly average room utilization rate is 44 percent.

#### Classroom/Lecture Hall Utilization – Weekly Summary

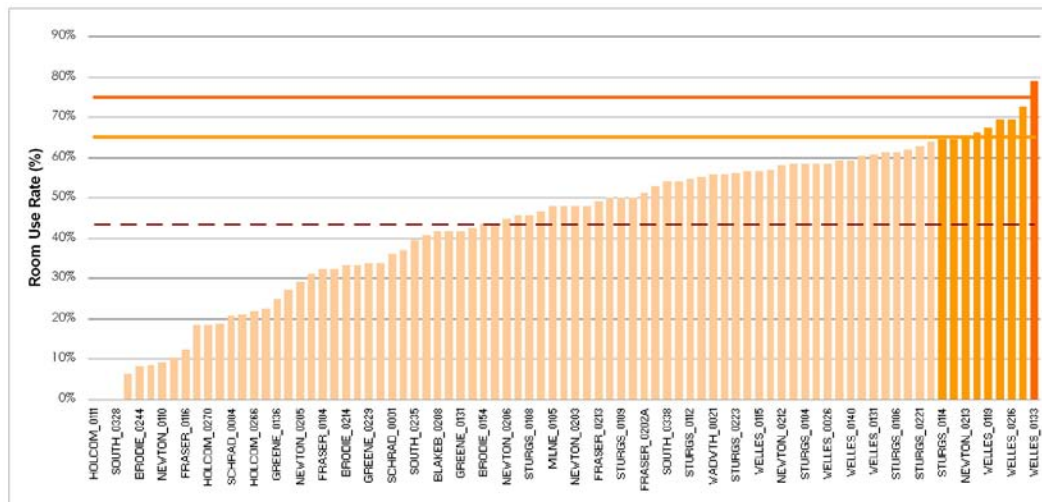

Average Weekly Rate – 44 percent – - - - -

Monday ———  
 Tuesday ———  
 Wednesday ———  
 Thursday ———  
 Friday ———

### Classroom/Lecture Hall Utilization by Room

The following chart depicts the average weekly room use rate by individual classroom/lecture hall. Each bar represents a unique classroom or lecture hall. Dark orange bars indicate rooms where the room utilization rates meet or exceed SUNY's target rates. Lighter orange bars indicate rooms where the room utilization rates meet or exceed the consultant's target rates.

The utilization rate represents the number of hours that the room is scheduled during the peak week versus the 40 hours available for scheduled use. The average weekly utilization rate for classrooms and lecture halls is approximately 44 percent. Overall, nine of the 83 available classrooms/lecture halls, or 10.8 percent, meet or exceed the consultant target utilization rate of 65 percent. Only one classroom/lecture hall – Welles 133 – meets or exceeds the SUNY target utilization rate of 75 percent at 79 percent.

#### Classroom/Lecture Hall Utilization by Room

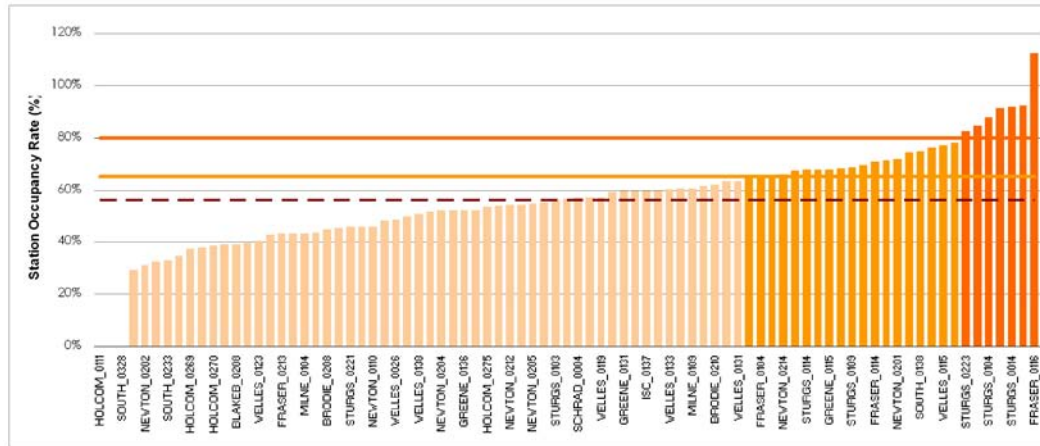

Average Weekly Rate – 44 percent - - - - -

SUNY Target —————

Consultant Target —————

### Classroom/Lecture Hall Station Occupancy by Room

The following chart depicts the average weekly station occupancy rates by individual classroom/lecture hall. The station occupancy rate represents the number of seats that are filled during a course meeting versus the number of available seats, as defined by the classroom capacity. Like room utilization, the station occupancy rate was determined for the courses that occur during the 40-hour peak week. The average weekly station occupancy rate for classrooms and lecture halls is approximately 56 percent. Overall, 26 of the 83 available classrooms/lecture halls, or 31 percent, meet or exceed the consultant target occupancy rate of 65 percent. Seven classrooms/lecture halls, or eight percent, meet or exceed the SUNY target station occupancy rate of 80 percent. Room 116 in the Fraser Building records the highest occupancy rate of 113 percent.

**Classroom/Lecture Hall Station Occupancy Rate by Room**

Average Weekly Rate – 56 percent - - - - -

SUNY Target —————

Consultant Target —————

### Tabular Summary – Classrooms/Lecture Halls

The following table translates the room utilization and station occupancy findings from the previous sections and summarizes them in tabular form. Dark orange cells indicate rooms where the room utilization rates or station occupancy rates meet or exceed SUNY's target rates. Light orange cells indicate rooms where the room utilization rates or station occupancy rates meet or exceed the consultant's target rates. The room list includes all classrooms (SUNY code 1001) and lecture halls (SUNY code 1100) identified in the PSI. Overall, the PSI identified a total of 93 classrooms and lecture halls. Only 80 of these rooms appeared in the Fall 2009 course schedule. The thirteen rooms that were not scheduled included:

- Holcomb Learning Center 111
- Holcomb Learning Center 216
- Holcomb Learning Center 233
- Holcomb Learning Center 234
- Holcomb Learning Center 235
- Holcomb Learning Center 236
- Holcomb Learning Center 238
- Holcomb Learning Center 244
- Holcomb Learning Center 255
- Holcomb Learning Center 260
- Holcomb Learning Center 284
- Integrated Science Center 330
- South Hall 328

Ten rooms in the Holcomb Learning Center are occupied by the State's Office of Mental Retardation and Developmental Disabilities and regarded as Public Service space not available to SUNY Geneseo. Consequently, they are excluded from the analysis. However, three of the thirteen rooms appeared as viable rooms for scheduled use and were included in the analysis – Integrated Science Center 330,

South Hall 328, and Holcomb 111. The analysis was based upon the assumption that 83 classrooms/lecture halls were available for scheduled use.

The table below includes the following categories:

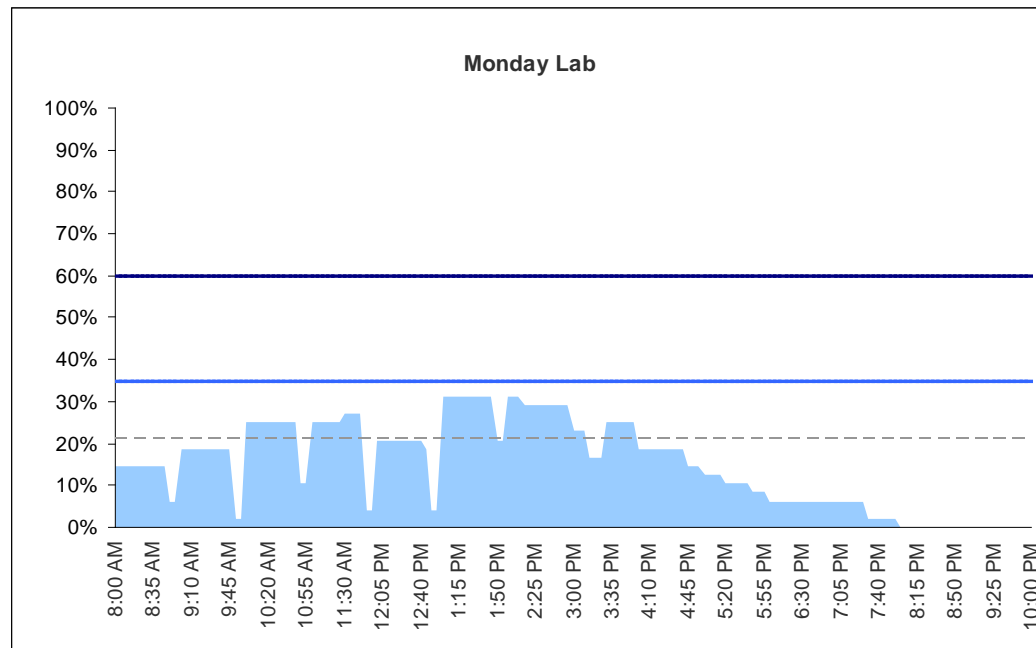

- Building Name
- Room Number
- SUNY Space Type Code (1001 and 1100)
- Area (NSF)
- Number of Seats/Stations
- NSF per Seat
- Weekly Room Utilization Rate
- Weekly Station Occupancy Rate
- Space Factor

The table documents room utilization and station occupancy separately to provide as detailed information as possible about each room. However, an additional column—space factor—was included that conflates the two figures and provides a single mechanism to evaluate each classroom/lecture hall. Gray indicates rooms that appear in the PSI, but are unscheduled.

Building	Room	SUNY Code	Area (Calc NSF)	# of Seats	NSF per Seat	Utilization Rate	Occupancy Rate	Space Factor

### Class Laboratory Utilization – Daily Summary

The following charts depict the laboratory utilization rates by day. While the charts document scheduled laboratory use at any time during the day, the average utilization rate was determined during the peak week, which is similarly defined as Monday through Thursday from 8:00 am until 5:00 pm and Friday from 8:00 am until noon. The charts measure the number of teaching laboratories in use out of the total available teaching laboratories. Assessments were made in five minute increments.

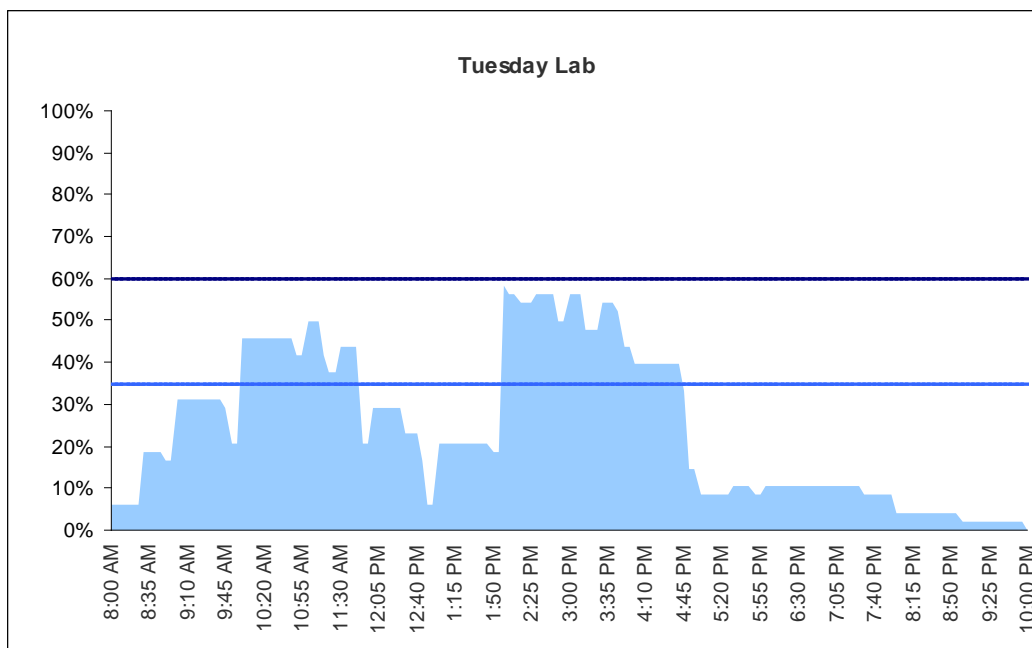

#### Teaching Laboratory Utilization – Monday

Average Rate – 21.2 percent – - - - -

SUNY Target —————

Consultant Target —————

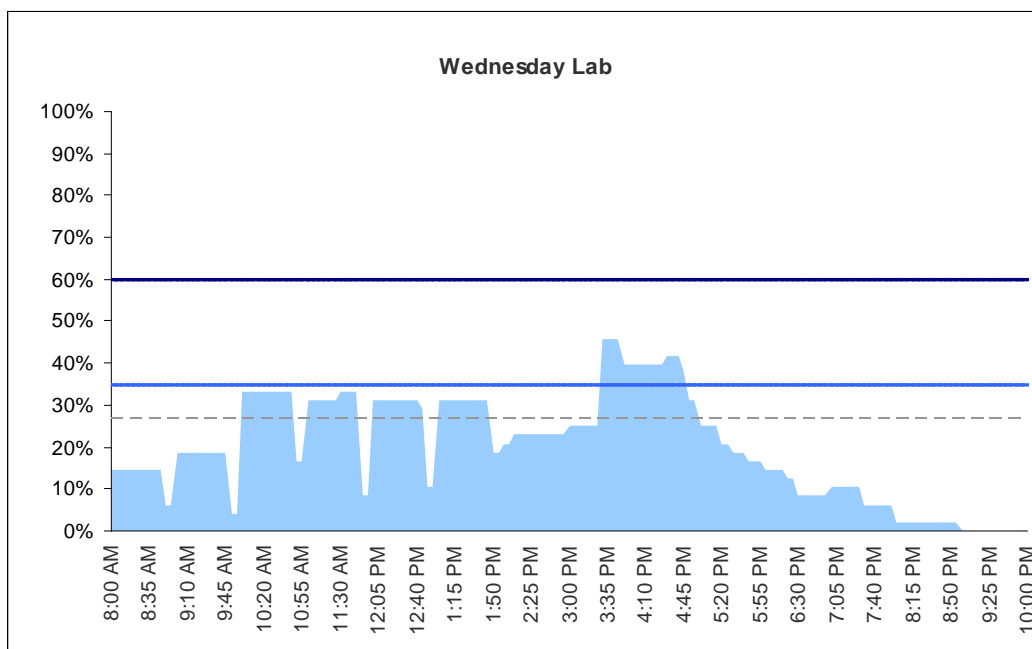

#### Teaching Laboratory Utilization – Tuesday

Average Rate – 34.6 percent - - - - -

SUNY Target —————

#### Teaching Laboratory Utilization – Friday

Average Rate – 8.9 percent (8:00 am – Noon) – - - - -

Average Rate – 9.2 percent (8:00 am – 5:00 pm) – - - - -

SUNY Target —————

Consultant Target —————

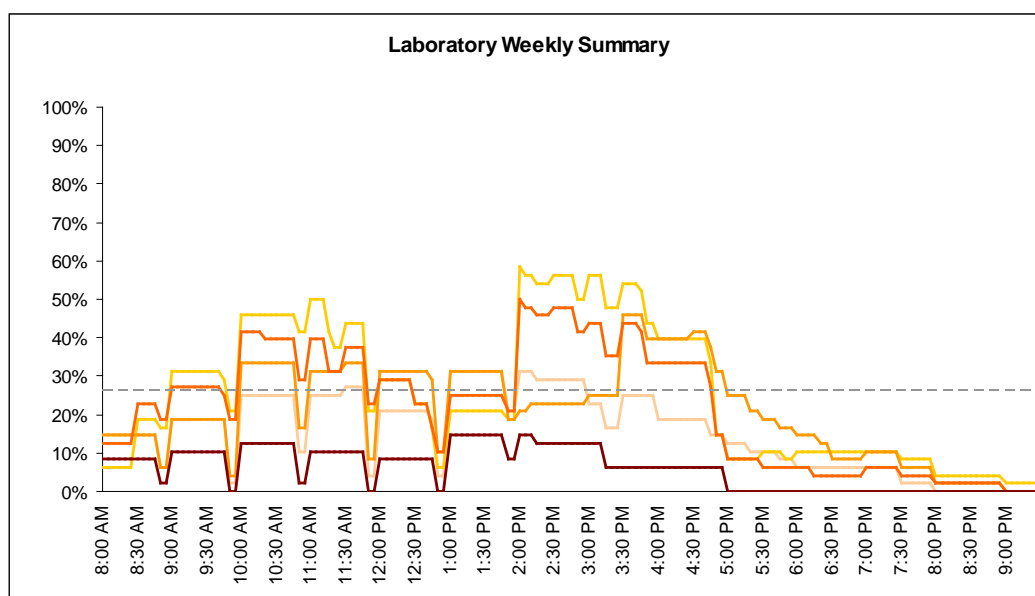

The following table summarizes the daily peak utilization rates for teaching labs:

PEAK DAILY AVERAGE UTILIZATION RATE	Percent
Monday	21.2%
Tuesday	34.6%
Wednesday	26.7%
Thursday	31.0%
Friday	8.9%

Utilization levels are fairly steady on Tuesdays and Thursdays between 10:00 am and 5:00 pm, with a gap during the lunch hour. On these days, laboratory room use rates are closest to meeting the consultant's target laboratory room use rate of 35 percent. Monday and Wednesday room use rates are slightly lower around 21 and 26 percent respectively, with a scant number of labs conducted on Friday. While Tuesdays and Thursdays nearly achieve the consultant's target rate, all days fall significantly below the SUNY laboratory use target of 60 percent.

### Class Laboratory Utilization – Weekly Summary

The following diagram illustrates composite utilization summary for Monday, Tuesday, Wednesday, Thursday, and Friday. The weekly average room utilization rate is 26 percent.

### Class Laboratory Utilization by Room

The following chart depicts the average weekly room use rates for teaching laboratories, or class laboratories. Each bar represents a unique teaching lab identified in the PSI. Like classroom/lecture hall utilization charts, dark orange bars indicate rooms where the room utilization rates meet or exceed SUNY's target rates. Lighter orange bars indicate rooms where the room utilization rates meet or exceed the consultant's target rates. The utilization rate represents the number of hours that the room is scheduled during the peak week versus the 40 hours available for scheduled use.

The average weekly utilization rate for all viable teaching laboratories is approximately 26 percent. Overall, 15 of the 48 available teaching labs, or 31 percent, meet or exceed the consultant target utilization rate of 35 percent. Only one teaching laboratory – Greene Science Building 314 – meets the SUNY target utilization rate of 60 percent.

#### Laboratory Utilization by Room

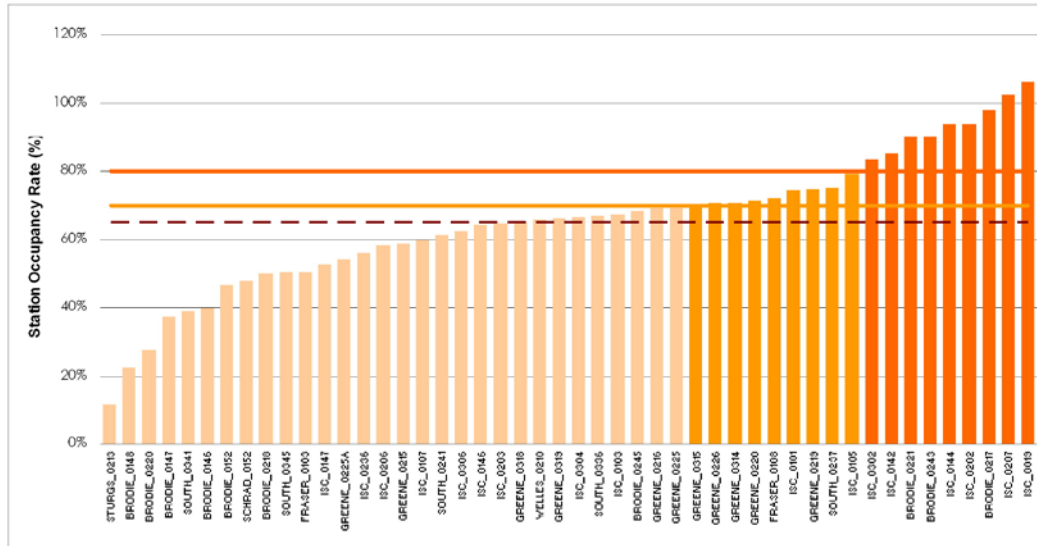

Average Weekly Rate – 26 percent – - - - -

SUNY Target – ————

Consultant Target – —————

### Class Laboratory Station Occupancy by Room

The following chart depicts the average weekly station occupancy rate by individual teaching laboratory. The station occupancy rate represents the number of seats that are filled during a course meeting versus the number of available seats, as defined by the laboratory capacity. Like room utilization, the station occupancy rate was determined for the courses that occur during the 40-hour peak week. The average weekly station occupancy rate for laboratories is fairly high at approximately 65 percent. Overall, 18 of the 48 available laboratories, or 38 percent, meet or exceed the consultant target station occupancy rate of 65 percent, while nine laboratories, or 19 percent of teaching labs, meet or exceed the SUNY target occupancy rate of 80 percent. Room 19 in the Integrated Science Center records the highest occupancy rate of 106 percent.

### Tabular Summary – Class Laboratories

The following table translates the room utilization and station occupancy findings from the previous sections and summarizes them in tabular form. Dark orange cells indicate rooms where the room utilization rates or station occupancy rates meet or exceed SUNY's target rates. Light orange cells indicate rooms where the room utilization rates or station occupancy rates meet or exceed the consultant's target rates. The room list includes all viable teaching laboratories (SUNY code 1300) identified in the PSI. The PSI identified a total of 73 teaching laboratories. Only 48 of these laboratories appeared in the Fall 2009 course schedule. The 25 rooms that were not scheduled are:

- Blake Building B 0213
- Blake Building C 0213
- Brodie Fine Arts Center 0239
- Fraser Building 0107A
- Greene Science Building 0114
- Greene Science Building 0121
- Greene Science Building 0124
- Greene Science Building 0126
- Greene Science Building 0127
- Greene Science Building 0127A
- Greene Science Building 0133
- Greene Science Building 0214
- Greene Science Building 0221
- Greene Science Building 0225A1
- Greene Science Building 0225A2
- Greene Science Building 0228B

- Holcomb Learning Center 0243
- Integrated Science Center 0008
- Integrated Science Center 0008B
- Integrated Science Center 0008C
- South Hall 0226
- Sturges Building 0008
- Sturges Building 0025
- Sturges Building 0027
- Sturges Building 0028

These rooms maintain small room capacities and largely function as project labs and research labs. Consequently, they are not regarded as viable teaching laboratories. The analysis is based upon the assumption that 48 teaching laboratories are available for scheduled use.

The table below follows the same structure as the Tabular Summary for classrooms/lecture halls, and includes the following categories:

- Building Name
- Room Number
- SUNY Space Type Code (1300)
- Area (NSF)
- Number of Seats / Stations
- NSF per Seat
- Weekly Room Utilization Rate
- Weekly Station Occupancy Rate
- Space Factor

## Comparison of Section Size to Room Capacity

The individual classrooms (SUNY code 1001), lecture halls (SUNY code 1100), and class laboratories (SUNY code 1300) identified in the tabular summaries have been examined in terms of room capacity and section size throughout the week. Diagrams located in the Appendix document the individual room and identify the courses that are conducted in the room throughout the week. The color of the bar indicates the department conducting the course, and the height of the bar indicates the section size. Consistent with the station occupancy findings, the room capacity often exceeds the average section size, especially for classrooms/lecture halls. This condition is particularly evident in the Newton Lecture Hall. Laboratories maintain a better fit between section size and room capacity.

## Summary of Findings

Overall, station occupancy and, in particular, room utilization rates do not achieve the targets established by both the SUNY System and recommended by the consultant. These findings refute the perceived shortage of classroom availability cited in the 2008 "Geneseo Academic Space Planning Report" by HHL Architects. SUNY Geneseo has the opportunity to significantly improve its room utilization and

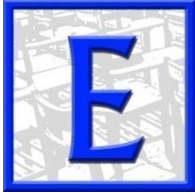

occupancy rates, and the findings suggest that course scheduling is a predominant issue.

Station occupancy rates also indicate that the existing classroom and lab space could be used more efficiently. Geneseo has expressed the desire to hold more seminar-style courses. Scheduling seminars in classrooms designed for thirty to forty students is not only a poor fit in terms of station occupancy, it is not the optimal physical environment to foster that style of pedagogy.

Interestingly, the same data that illustrates SUNY Geneseo's relatively low classroom use and utilization also suggests that the College is well positioned, from a facilities point of view, to achieve two of its academic goals: smaller class size and a lower student-to-faculty ratio, both of which would create the demand for more classrooms. Right-sizing these spaces by reconfiguring partition walls or providing different furniture, coupled with more disciplined scheduling practices, could support Geneseo's pedagogical goals without constructing any additional classroom space. In addition, available teaching labs can be used to accommodate projected increases in faculty research, intended to engage students in hands-on learning.

## Calculation of Space Needs

### Methodology

A space needs analysis was prepared as part of the Facilities Master Plan process to establish current and future space needs for a variety of space types; to determine space surpluses and shortages; and to generate an overall program for the master plan. Space needs were determined for the current year, 2013, 2018, and 2023. In general, the assessment of space need is based on the consultant's understanding of the SUNY Guidelines (Space Factor document) provided by SUCF. Where alternative guidelines are appropriate, consultant recommendations have been provided. These recommendations are based upon national and international models, including guidelines prepared by the Council of Education Facilities Planners International (CEFPI), the Pennsylvania State Higher Education Board, and Thomas Ricca Associates, in addition to the consultants' accumulated experience in space programming.

#### **Council of Educational Facilities Planners International (CEFPI)**

CEFPI guidelines are the most widely accepted higher education space planning metrics in the U.S. and are applied to most non-residential space categories.

#### **Pennsylvania State Higher Education Guidelines**

The Pennsylvania State Higher Education guidelines have proven to be helpful as a supplement to the CEFPI guidelines. For this space analysis, the Pennsylvania State guidelines have been incorporated into the consultant's projection of exhibition space and meeting rooms.

#### **Thomas Ricca Associates**

CEFPI guidelines for dining facilities provide a high level understanding of dining space needs. Guidelines developed by Thomas Ricca Associates, leading consultants on dining requirements for universities, provide a more detailed assessment of dining needs and are incorporated in the space analysis.

The space types assessed within the analysis include the 15 space categories defined by the SUNY System. For the space categories 1.1 Classrooms through 2.3 Research and Support, the SUNY system relies on standards for average weekly contact hours per FTE for each department. These contact hours are not derived from the current course schedule, but were predetermined by the SUNY system as averages. Since these figures were not provided to the consultant teams, the projections for classrooms, lecture halls, and class laboratories are based upon actual contact hours generated by the fall 2009 course schedule for both the SUNY and Consultant space projections. This suggests that the SUNY system may generate different space projections in those categories based upon its internal average weekly contact hours per FTE.

## Space Need Influences

Space need projections are driven by enrollment growth or reduction, projected

changes in emphasis in college programs. Beyond an increased emphasis in undergraduate engagement in research and an organization shift within the School of Education, there are no major changes projected in college programs that will impact space needs. There is sufficient space to accommodate this shift in emphasis.

As indicated in the enrollment section, the College's desire to increase its selectivity among liberal arts colleges through a reduced student-to-faculty ratio and overall reduction in enrollment is factored into the projections that drive the space analysis.

The most significant stated shift in philosophical approach to education is Geneseo's desire to reduce its student-to-faculty ratio. This emphasis will impact the number of required offices, and ultimately, the number of instructional sections taught per term. Geneseo's desire to foster a more intimate, interactive, project-based approach to learning will increase the classroom station size requirement per student to install tables and chairs, instead of tablet chairs. Typically, rooms suitable for group study require up to 25 feet per station, as compared to the SUNY standard of 16 feet. This increases the demand for classroom space significantly over the SUNY calculation. Geneseo has sufficient instructional space to accommodate this change in pedagogy.

## Tabular Summary of Projected Space Need

SPACE NEED BY CATEGORY: CONSULTANT METHOD	EXISTING SPACE	CURRENT NEED	NEED IN 2013	NEED IN 2018	NEED IN 2023

## 1.1 Classrooms

### SUNY Guideline

The SUNY Guideline for classroom space largely resembles the classroom guideline generated by CEFPI, which applies a Space Factor against the number of student FTEs at each phase. The Space Factor equals the product of Average Weekly Contact Hours per FTE and the Average Square Foot per Station, divided by the Weekly Contact Hours per Station. The Average Weekly Contact Hours were generated from the fall 2009 Course Schedule and were determined for individual departments generating demand for classrooms. Non-laboratory course enrollments with fewer than 60 students were assumed to generate demand for classrooms as opposed to lecture halls. The Facilities Programming Guidelines (Blue Book) recommends 16 asf per station for classroom space and was incorporated in the projection as the Average Square Foot per station. The Weekly Contact Hours per Station is based upon a 40-hour week, and applies a room utilization rate of 75 percent and a station occupancy rate of 80 percent. The Division of Budget requires that an 18 percent multiplier be applied to the Weekly Contact Hours per Station, which effectively reduces the space need by requiring higher levels of efficiency and occupancy.

### Consultant Recommendation

The consultant recommendation is based upon the CEFPI guidelines, which determines the space need using a series of inputs that include SUNY Geneseo's weekly student contact hours (WSCH), average station size, station occupancy rates, and room utilization rates. Collectively these inputs generate a space need, which is then compared to the existing assignable square footage of centrally scheduled rooms. The difference between the two figures determines whether a surplus or a deficit exists. This classroom space need is determined using the following formula:

$$\frac{\text{Weekly student contact hours (WSCH)} \times \text{Average Station Size}}{\text{Peak Week Hours} \times \text{Room Use Rate} \times \text{Station Occupancy Rate}} = \text{Space Need}$$

This formula resembles the formula recommended within the SUNY Guideline. However, the consultant incorporates different inputs. Rather than using 16 asf per station, an average station size of 22 asf was applied. This station size includes provision for a variety of furniture types ranging from tablet arm chairs to larger work tables. The model also applies a room utilization rate of 65 percent, rather than 75 percent, and a station occupancy rate of 65 percent rather than 80 percent. Like the SUNY Guideline, the Average Weekly Contact Hours were based on the fall 2009 Course Schedule and were determined for individual departments generating demand for classrooms. Non-laboratory course enrollments with fewer than 60 students were used to generate demand for classrooms.

### Space Need

The following table documents the aggregate classroom space need through 2023, according to the SUNY and Consultant models. Departmental space needs for classrooms are provided in the Appendix.

1.1 CLASSROOMS	SUNY	SURPLUS/ (DEFICIT)	CONSULTANT	SURPLUS/ (DEFICIT)
Existing Space	64,719		64,719	
Need – Current	22,361	42,358	51,523	13,196
Need – 2013	22,303	42,416	51,390	13,329
Need – 2018	22,246	42,473	51,257	13,462
Need – 2023	22,188	42,531	51,125	13,594

The SUNY and Consultant methodologies reveal a surplus of classroom space, both now and in the future. Applying the consultant methodology reveals a future surplus of 13,594 asf of classroom space. The higher space need projected using the consultant methodology reflects the larger station size and lower levels of utilization and station occupancy. The surplus of classroom space invites opportunities to repurpose some existing instructional spaces for informal learning and to accommodate unscheduled active learning. It also gives Geneseo the opportunity to repurpose surplus instructional space for additional faculty offices, and allows for the phased renovation of older classroom / office buildings.

## 1.2 Lecture Halls

### **SUNY Guideline**

The SUNY Guideline for lecture halls relies upon the same formula that was used to project classroom space need, but incorporates different inputs. The Average Weekly Contact Hours were based on the fall 2009 Course Schedule and were determined for individual departments generating demand for lecture hall space. Non-laboratory course enrollments that exceed 60 students were assumed to generate demand for lecture halls. The Facilities Programming Guidelines (Blue Book) recommends 13 asf per station for lecture hall station size. The Weekly Contact Hours per Station is the same for classrooms and lecture halls and incorporates a room utilization rate of 75 percent and a station occupancy rate of 80 percent. The Division of Budget similarly requires that an 18 percent multiplier be applied to the Weekly Contact Hours per Station.

### **Consultant Recommendation**

The consultant recommendation for lecture hall space need also relies upon the CEFPI model, but incorporates different inputs. As with the SUNY guideline, the Average Weekly Contact Hours were based on the fall 2009 Course Schedule and were determined for individual departments generating demand for lecture halls. The average station size was assumed to be 15 asf versus 13 asf. Fifteen asf takes into account teaching space for the instructor in addition to the student seating space, and allows for provision of wheelchair accessible spaces. Like classrooms, the room utilization rate and station occupancy rate for lecture halls was similarly set at 65 percent.

## Space Need

The following table documents the aggregate lecture hall space need at the various phases, according to the SUNY and Consultant models. Departmental space needs for lecture halls are provided in the Appendix.

1.2 LECTURE HALLS	SUNY	SURPLUS / (DEFICIT)	CONSULTANT	SURPLUS / (DEFICIT)
Existing Space	30,563		30,563	
Need – Current	5,070	25,493	9,149	21,414
Need – 2013	5,029	25,534	9,075	21,488
Need – 2018	4,988	25,575	9,002	21,561
Need – 2023	4,948	25,615	8,929	21,634

Applying both the SUNY and Consultant methodologies reveals a surplus of lecture hall space both now and in the future in the amount of nearly 22,000 asf. The consultant's recommended space need is elevated and reflects the lower levels of room utilization and station occupancy. The majority of lecture halls are located within the Newton Lecture Hall as tiered seating.

## 2.1 Teaching Labs

### SUNY Guideline

The SUNY Guideline for teaching laboratory space need relies upon the same formula that was used to project classroom and lecture hall space need, but incorporates different inputs. The Average Weekly Contact Hours were generated from the fall 2009 Course Schedule and were determined for individual departments generating demand for laboratories. Specific average station sizes were applied to each department generating demand for laboratory space, and align with the recommended station sizes listed in the Facilities Programming Guidelines document (Blue Book). The following station sizes were applied as follows:

- School of Business – 45 asf (LD and UD); 60 asf (Graduate)
- Education – 40 asf (LD, UD, and Graduate)
- Art – 50 asf (LD, UD, and Graduate)
- Performing Arts – 80 asf (LD, UD, and Graduate)
- Foreign Language – 30 asf (LD, UD, and Graduate)
- Biology – 50 asf (LD and UD); 60 asf (Graduate)
- Chemistry – 50 asf (LD, UD, and Graduate)
- Computer Science – 40 asf (LD, UD, and Graduate)
- Geological Sciences – 50 asf (LD, UD, and Graduate)
- Mathematics – 45 asf (LD, UD, and Graduate)
- Physics – 50 asf (LD, UD, and Graduate)
- Geography – 50 asf (LD, UD, and Graduate)
- Communication – 45 asf (LD and UD); 60 asf (Graduate)
- Communicative Disorders and Sciences – 45 asf (LD and UD); 60 asf (Graduate)

The Weekly Contact Hours per Station is based upon a 40-hour week and applies a room utilization rate of 60 percent and a station occupancy rate of 80 percent. The Division of Budget's 18 percent multiplier is also applied to the Weekly Contact Hours per Station.

**Consultant Recommendation**

The consultant recommendation for teaching laboratories also relies upon the CEFPI model. Like the SUNY recommendation, the Average Weekly Contact Hours were generated from the fall 2009 Course Schedule and were determined for individual departments generating demand for laboratories. Specific average station sizes were applied to each department generating demand for laboratory space. In many cases, the average station size recommendation aligns with the SUNY station size, but diverges in others. The consultants recommend that a larger station size be used for hard sciences such as biology, chemistry, and physics to accommodate new forms of technology and project-based approaches to learning. In some departments, such as business, mathematics, and communication, the average station size was reduced to reflect the recommended station size for soft sciences.

- School of Business – 40 asf (LD, UD, and Graduate)
- Education – 40 asf (LD, UD, and Graduate)
- Art – 50 asf (LD, UD, and Graduate)
- Performing Arts – 80 asf (LD, UD, and Graduate)
- Foreign Language – 30 asf (LD, UD, and Graduate)
- Biology – 55 asf (LD, UD, and Graduate)
- Chemistry – 55 asf (LD, UD, and Graduate)
- Computer Science – 40 asf (LD, UD, and Graduate)
- Geological Sciences – 50 asf (LD, UD, and Graduate)
- Mathematics – 40 asf (LD, UD, and Graduate)
- Physics – 55 asf (LD, UD, and Graduate)
- Geography – 50 asf (LD, UD, and Graduate)
- Communication – 40 asf (LD, UD, and Graduate)
- Communicative Disorders and Sciences – 45 asf (LD, UD, and Graduate)

The Weekly Contact Hours per Station was based upon a 40-hour week and applied a room utilization rate of 35 percent and a station occupancy rate of 70 percent. The room use rate for laboratories is typically lower than that of a classroom to reflect the set-up and clean-up time required for laboratory use, unscheduled time needed for project work, and the specialized nature of labs. This could also provide opportunities to enhance undergraduate research at Geneseo.

**Space Need**

The following table documents the aggregate teaching laboratory space need through 2023, according to the SUNY and Consultant models. Departmental space needs for teaching labs are provided in Appendix 4.

2.1 TEACHING LABS	SUNY	SURPLUS/ (DEFICIT)	CONSULTANT	SURPLUS/ (DEFICIT)
Existing Space	100,823		100,823	
Need – Current	16,947	83,876	46,517	54,306
Need – 2013	16,776	84,047	46,057	54,766
Need – 2018	16,586	84,237	45,552	55,271
Need – 2023	16,411	84,412	45,070	55,753

Applying both the SUNY and Consultant methodologies reveals a significant surplus of teaching laboratory space both now and in the future that approaches 55,800 asf. The apparent surplus of lab space will support increased emphasis on project-based learning and undergraduate research.

## 2.2 Individual Study Labs

### SUNY Guideline/Consultant Recommendation

The SUNY Guideline suggests that the space that is provided for individual study labs be based on student contact hours. Since individual study labs do not generate demand for scheduled instruction, the contact hours are effectively zero. For individual study labs, it is then recommended that the existing amount of space equal the recommended amount of space, for both current and future student populations. Applying this methodology, the aggregate space need for individual study labs is as follows:

2.2 INDIVIDUAL STUDY LABS	SUNY/ CONSULTANT	SURPLUS/ (DEFICIT)
Existing Space	14,833	
Need – Current	14,833	0
Need – 2013	14,833	0
Need – 2018	14,833	0
Need – 2023	14,833	0

## 2.3 Departmental Research Labs

### SUNY Guideline/Consultant Recommendation

As with individual study labs, the SUNY Guideline for departmental research labs suggests that the amount of space that is provided be based on student contact hours. Since research labs do not generate demand for scheduled instruction, the contact hours are effectively zero. Consequently, it is recommended that the existing amount of space equal the recommended amount of space, for both current and future student populations. Applying this methodology, the aggregate space need for departmental research labs is as follows:

2.3 DEPARTMENTAL RESEARCH LABS	SUNY/ CONSULTANT	SURPLUS/ (DEFICIT)
Existing Space	20,443	
Need – Current	20,443	0
Need – 2013	20,443	0
Need – 2018	20,443	0
Need – 2023	20,443	0

The College's desire to increase its emphasis on undergraduate research does not necessarily require additional or dedicated research laboratory space. The surplus of instructional lab space, especially within the Integrated Science Center will accommodate research activity.

## 2.4 Faculty and Staff Offices

### SUNY Guideline

The SUNY Guideline for faculty and staff offices recommends that a Faculty Office Factor be applied to the number of current and future faculty FTE figures. The Faculty Office Factors are department-specific and include space allocations for both faculty and academic support staff space. The Faculty Office Factors were not provided within the SUNY Guidelines. In the absence of such data, a weighted average office size was determined for each department, and was based upon the breakdown of standard faculty offices, laboratory offices, and studio offices within each department according to the PSI. The Facilities Programming Guidelines (Blue Book), the SUNY System recommends 120 asf for a standard faculty office, 180 asf for a studio office, and 150 asf for a laboratory office. Using these space factors and the breakdown of office types within individual departments, a weighted average office size was determined for each department. A multiplier of 1.33 was applied to account for faculty office support space and staff office space. This multiplier was based on the recommendation of 160 asf per budgeted FTE for office support space.

### Consultant Recommendation

The consultant recommendation for faculty and staff office space applies an average office size to current and future faculty FTE figures. Rather than apply a support and staff multiplier, an average office size of 160 asf per faculty FTE was applied to account for the faculty office spaces and related staff and support spaces.

### Space Need

The following table documents the aggregate faculty and staff office space need at the various milestones, according to the SUNY and Consultant models. Departmental space needs for faculty and staff offices are provided in the Appendix.

2.4 FACULTY AND STAFF OFFICES	SUNY	SURPLUS/ (DEFICIT)	CONSULTANT	SURPLUS/ (DEFICIT)
Existing Space	95,645		95,645	
Need – Current	48,750	46,895	45,066	50,579
Need – 2013	57,136	38,509	52,845	42,800
Need – 2018	60,711	34,934	56,179	39,466
Need – 2023	64,796	30,849	59,990	35,655

The analysis reveals a substantial surplus of faculty and staff office space for both current and future enrollment scenarios, when applying both the SUNY and Consultant methodologies. The findings suggest that Geneseo will be able to successfully accommodate the anticipated increase in faculty FTE, which takes into account the desired 14:1 student-to-faculty ratio.

## 2.5 General and Special Use

### SUNY Guideline/Consultant Recommendation

The SUNY Guideline for general and special use space recommends that a general use factor (percentage) be applied to the sum of departmental spaces for individual academic departments. The General Use percentages vary by department and were not provided within the SUNY Guidelines. Biology and Mathematics were included as examples within the Space Factor document and revealed general use percentages of ten percent and one percent respectively. Using these figures as references, general use percentages of either ten percent or one percent were then applied to each department depending on the nature of the department and the assumed level of required departmental support space. These percentages were then multiplied against the sum of departmental support spaces needed both now and in the future. Applying this methodology, the aggregate space need for general and special use space is as follows:

2.5 GENERAL AND SPECIAL USE SPACE	SUNY/ CONSULTANT	SURPLUS/ (DEFICIT)
Existing Space	11,666	
Need – Current	7,778	3,888
Need – 2013	8,143	3,523
Need – 2018	8,271	3,395
Need – 2023	8,421	3,245

The analysis reveals a slight surplus of general and special use space for both current and future enrollment scenarios.

### 3.0 Health and Physical Education (HPE)

#### SUNY Guideline

The SUNY Guideline for Arts and Science institutions with enrollments between 4,001 and 6,000 FTE generates a current and future space need of 120,000 asf for health and physical education space.

#### Consultant Recommendation

The consultant recommendation for health and physical education space is based upon the CEFPI guidelines, which recommends 20,000 asf for a core of 1,000 FTE plus five asf per FTE beyond the core population. For institutions with robust athletics programs and strong intramural activity, such as SUNY Geneseo, the recommendation is to double the space need to account for both recreation and athletics spaces.

#### Space Need

The following table documents the health and physical education space need at the various phases, according to the SUNY and Consultant models.

3.0 HPE	SUNY	SURPLUS/ (DEFICIT)	CONSULTANT	SURPLUS/ (DEFICIT)
Existing Space	98,417		98,417	
Need – Current	120,000	(21,583)	83,022	15,395
Need – 2013	120,000	(21,583)	82,845	15,572
Need – 2018	120,000	(21,583)	82,668	15,749
Need – 2023	120,000	(21,583)	82,491	15,926

Applying the consultant methodology reveals a current and future surplus of health and physical education space on campus. The anticipated stadium will complement the indoor facilities with much-needed outdoor field areas. While an apparent surplus exists, it was also noted during interviews with athletics and recreation that the next desired athletic and recreation facility priority is to complete a field house.

### 4.0 Data and Resources Center (IT)

#### SUNY Guideline/Consultant Recommendation

The space need projection for Data and Resources Center (IT) combines the SUNY Guidelines for Instruction Resources and Data Processing. For Arts and Science institutions with enrollments between 4,001 and 6,000 FTE, SUNY recommends 14,178 asf for Instructional Resource space and 6,030 asf for Data Processing space. These figures apply to both current and future student population scenarios, and reveal a slight surplus of Data and Resources Center (IT) space.

4.0 DATA AND RESOURCES CENTER	SUNY / CONSULTANT	SURPLUS / (DEFICIT)
Existing Space	20,287	
Need – Current	20,208	79
Need – 2013	20,208	79
Need – 2018	20,208	79
Need – 2023	20,208	79

## 5.0 Organized Activities

### SUNY Guideline/Consultant Recommendation

For organized activity space, SUNY recommends that the existing amount of space equal the required amount of space. According to SUNY, Organized Activity spaces "contain space for enterprises conducted primarily for the purpose of providing (professional) training and experience for students (e.g. Health Science Centers have clinics and hospitals)." SUNY Geneseo currently has 688 asf of space devoted to organized activities, which also functions as the projected need both now and in the future.

5.0 ORGANIZED ACTIVITIES	SUNY/ CONSULTANT	SURPLUS/ (DEFICIT)
Existing Space	688	
Need – Current	688	0
Need – 2013	688	0
Need – 2018	688	0
Need – 2023	688	0

## 6.0 Organized (Sponsored) Research

### SUNY Guideline/Consultant Recommendation

SUNY recommends that the existing amount of space equal the required amount of space for organized (sponsored) research. According to SUNY, Organized (Sponsored) Research spaces "are identified and separately financed, for organized research units, independent of other academic departments." Geneseo currently has no organized (sponsored) research space recorded in its PSI. Consequently there is no current or future anticipated need for such space.

6.0 ORGANIZED (SPONSORED) RESEARCH	SUNY/ CONSULTANT	SURPLUS/ (DEFICIT)
Existing Space	0	
Need – Current	0	0
Need – 2013	0	0
Need – 2018	0	0
Need – 2023	0	0

## 7.0 Public Services

### SUNY Guideline/Consultant Recommendation

For public service space, SUNY recommends that the existing amount of space equal the required amount of space. According to SUNY, Public Service spaces are "administrative units, which, although they may be departmentally oriented, serve the public outside the realm of practice or research, derive space from this sub-component." SUNY Geneseo currently has 14,596 asf of public service space, which functions as the projected need both now and in the future. The majority of this space is located within the recently acquired Doty Building.

7.0 PUBLIC SERVICE	SUNY/ CONSULTANT	SURPLUS/ (DEFICIT)
Existing Space	14,596	
Need – Current	14,596	0
Need – 2013	14,596	0
Need – 2018	14,596	0
Need – 2023	14,596	0

## 8.0 Assembly and Exhibition

### SUNY Guideline

The SUNY Guideline for Arts and Science institutions with enrollments between 4,001 and 6,000 FTE recommends 36,130 asf of assembly and exhibition space. Since enrollment growth between 2009 and 2023 stays within this enrollment range, 36,130 asf remains the recommended assembly and exhibition space need at the various phases.

### Consultant Recommendation

The consultant recommendation for assembly and exhibition space is based upon the CEFPI and Pennsylvania State Higher Education guidelines respectively. For assembly space, the CEFPI guidelines recommend 19,950 asf for a core of 5,000 students plus six asf per FTE beyond the initial 5,000 students. The 19,950 asf core includes the following components:

- Seating areas with up to 500 seats at 10 asf each – 5,000 asf
- Stage and Wings – 3,500 asf
- Control Rooms – 400 asf
- Costume and Storage – 2,000 asf
- Scene Shop/Sets and Props Storage – 5,000 asf
- Lighting, Design, Storage, and Repair – 400 asf
- Sound Effects Production – 150 asf
- Rehearsal Room – 2,000 asf
- Make-up and Dressing Rooms – 1,000 asf
- Green Room – 500 asf

For exhibition space, the Pennsylvania State Higher Education guidelines recommend 1,500 asf for a core of 2,000 students plus one asf per student FTE beyond the initial 2,000 students and one asf per faculty FTE.

### Space Need

The following table documents the assembly and exhibition space need at the various phases, according to the SUNY and Consultant models.

8.0 HPE	SUNY	SURPLUS/ (DEFICIT)	CONSULTANT	SURPLUS/ (DEFICIT)
Existing Space	33,750		33,750	
Need – Current	36,130	(2,380)	26,847	6,903
Need – 2013	36,130	(2,380)	26,772	6,978
Need – 2018	36,130	(2,380)	26,669	7,081
Need – 2023	36,130	(2,380)	26,569	7,181

The findings reveal a slight surplus of assembly and exhibition space both now and in the future, according to the consultant model. While assembly and exhibition space may be sufficient in terms of quantity, the question of quality is considered within the facilities master plan design solutions.

## 9.0 Library

### SUNY Guideline

The SUNY Guidelines recognize the three traditional library space need components – seating or reading space, stack or collection space, and administrative or support space. The Guidelines recommend 4.89 asf per student FTE for library seating space. SUNY Geneseo's bound volume collection size of 450,000 volumes prescribes a bound volume factor of 0.068 asf per volume to project collection space. Library administration space is calculated as 25 percent of seating and collection space.

### Consultant Recommendation

The consultant recommendation for library space is based upon the CEFPI guidelines, which calculates reading or seating space by multiplying student and faculty FTE figures by a use rate. This figure is then multiplied against an average seating station size. A use rate of 20 percent is recommended for reading space inside the library, while 28 asf is used as the average station size. While the SUNY Guideline determines the collection space need based on number of volumes, the CEFPI model includes all library materials, e.g. bound volumes, AV materials, periodicals, flat files, etc., and translates them into bound volume equivalents. This method captures the full extent of the library collection. Geneseo currently records 450,000 bound volumes and 848,654 microforms in its collection. After translating the library materials into bound volume equivalents, the model then applies a space factor of 0.10 asf per bound volume equivalent to the first 150,000 volumes, 0.09 asf per bound volume

equivalent to the subsequent 150,000 volumes, and 0.08 asf per bound volume equivalent to the remaining volumes. Due to the rapid digitization of library collections, the model assumes a modest rate of growth (one percent) in collection size. Service, or administration, space is calculated at 20 percent of library reading or seating space and stack space.

While the SUNY Guideline projects library space within the library, it fails to recognize that studying occurs outside the library. The consultant model also projects a need for reading or seating space outside the library. This figure is calculated in the same manner as reading or seating space, but applies a ten percent use rate. The consultant methodology also projects a need for meeting rooms to accommodate group study space needs. This space is calculated using the Pennsylvania State Higher Education guideline, which recommends one asf per student FTE.

### Space Need

The following table documents the library space need through 2023, according to the SUNY and Consultant models.

9.0 LIBRARY	SUNY	SURPLUS/ (DEFICIT)	CONSULTANT	SURPLUS/ (DEFICIT)
Existing Space	59,563		59,563	
Need – Current	70,660	(11,097)	97,023	(37,460)
Need – 2013	70,552	(10,989)	99,769	(40,206)
Need – 2018	70,443	(10,880)	102,435	(42,872)
Need – 2023	70,335	(10,772)	105,260	(45,697)

Of the existing space, approximately 49,000 asf is located within the Milne Library, with the remaining space located in the Fraser Building. The consultant recommendation exceeds the SUNY recommendation largely because it accounts for reading and study space outside of the library. Applying the consultant methodology, there is a current deficit of nearly 37,500 asf and a future deficit of approximately 46,000 asf. Of the space deficit in 2023, approximately 26,400 asf is related to the Milne Library, with the remaining space deficit related to study space outside the library. The reallocation of surplus instructional space in academic buildings could help offset some of the study space deficit outside the library.

## 10.0 Student and Faculty Activities

### SUNY Guideline

The SUNY Guideline for student and faculty activity space is calculated at 10.5 asf per FTE.

### Consultant Recommendation

The consultant recommendation for student/faculty activity space need includes dining and student life spaces. Dining space needs are determined using a methodology prepared by Thomas Ricca Associates, leading consultants on dining requirements for universities. This method calculates space need for dining, servery, kitchen, and dish

room areas. The model assumes that 60 percent of students will dine on campus and that 60 percent of these students will dine during the peak hour, at a triple turnover rate. Eighty percent seating efficiency is assumed along with a seating station size of 17 asf per seat. The CEFPI guidelines are applied to calculate student life space needs. The model recommends nine asf per student FTE.

### Space Need

The following table documents the student/faculty activity need at the various phases, according to the SUNY and Consultant models.

10.0 STUDENT – FACULTY ACTIVITY	SUNY	SURPLUS / (DEFICIT)	CONSULTANT	SURPLUS / (DEFICIT)
Existing Space	110,319		110,319	
Need – Current	55,673	54,646	75,291	35,028
Need – 2013	55,487	54,832	75,040	35,279
Need – 2018	55,301	55,018	74,789	35,530
Need – 2023	55,116	55,203	74,537	35,782

Applying both the SUNY and Consultant methodologies reveals a significant surplus of student/faculty activity space. The existing space does not take into account residential dining facilities, which would elevate the surplus by an additional 41,310 asf. While there is a sufficient amount of student and faculty activity space for both the current and future student populations, the quality and appropriateness of these spaces to support a diverse array of student and faculty experiences needs to be addressed.

## 11.0 Student Health Services

### SUNY Guideline/Consultant Recommendation

For student health services space, SUNY recommends that the existing amount of space equal the required amount of space. SUNY Geneseo currently has 5,597 asf of space devoted to student health services, which also functions as the projected need both now and in the future. This space is located entirely in the Lauderdale Health Center.

11.0 STUDENT HEALTH SERVICES	SUNY / CONSULTANT	SURPLUS / (DEFICIT)
Existing Space	5,597	
Need – Current	5,597	0
Need – 2013	5,597	0
Need – 2018	5,597	0
Need – 2023	5,597	0

## 12.0 General Administration

### SUNY Guideline

The SUNY Guideline for general administration space accounts for all non-academic staff and is calculated at 8 asf per student FTE.

### Consultant Recommendation

The consultant recommendation for general administration space applies an average office size of 160 asf per FTE to all non-academic general administration staff. Rather than assign private offices to service/maintenance staff, an allocation of ten asf per service/maintenance staff is provided to account for staff and locker rooms. It is assumed that general administrative staff figures will maintain the existing student to staff ratio and grow proportionately as the student population increases.

### Space Need

The following table documents the administration space need at the various milestones, according to the SUNY and Consultant models. Applying both the SUNY and Consultant methodologies reveals a surplus of general administrative space.

12.0 GENERAL ADMINISTRATION	SUNY	SURPLUS / (DEFICIT)	CONSULTANT	SURPLUS / (DEFICIT)
Existing Space	66,049		66,049	
Need – Current	42,418	23,631	38,510	27,539
Need – 2013	42,276	23,773	38,382	27,667
Need – 2018	42,134	23,915	38,253	27,796
Need – 2023	41,993	24,056	38,125	27,924

## 13.0 Central Services

### SUNY Guideline/Consultant Recommendation

For Arts and Science institutions with enrollments between 4,001 and 6,000 FTE, SUNY recommends 36,320 asf of space for central services. Since enrollments are never expected to grow beyond 6,000 FTE at Geneseo, the recommended amount of space holds true at all enrollment levels. Applying this methodology reveals a surplus of approximately 19,100 asf of central service space.

13.0 CENTRAL SERVICES	SUNY / CONSULTANT	SURPLUS / (DEFICIT)
Existing Space	55,428	
Need – Current	36,320	19,108
Need – 2013	36,320	19,108
Need – 2018	36,320	19,108
Need – 2023	36,320	19,108

## 14.0 Building Services

### SUNY Guideline/Consultant Recommendation

For Arts and Science institutions with enrollments between 4,001 and 6,000 FTE, SUNY calculates building service space need at three percent of the existing space from categories one through 13. Since the proposed need in these categories never exceeds the amount of existing space, three percent is applied to the existing space throughout 2023. The total amount of existing space in categories one through 13 is 803,386 asf, which translates into a current and future space need of 24,102 asf.

14.0 BUILDING SERVICES	SUNY / CONSULTANT	SURPLUS / (DEFICIT)
Existing Space	15,753	
Need – Current	24,102	(8,349)
Need – 2013	24,102	(8,349)
Need – 2018	24,102	(8,349)
Need – 2023	24,102	(8,349)

Applying this methodology reveals a current and future deficit of approximately 8,350 asf of building service space.

## 15.0 Inactive Space

### SUNY Guideline/Consultant Recommendation

SUNY Geneseo currently has 24,808 asf of inactive space on campus. Inactive space need should not be projected now or in the future and should remain zero. A certain amount of space will always be “off line” due to the continuing renovation of existing space to accommodate ever changing needs.

15.0 INACTIVE SPACE	SUNY / CONSULTANT	SURPLUS / (DEFICIT)
Existing Space	24,808	
Need – Current	0	24,808
Need – 2013	0	24,808
Need – 2018	0	24,808
Need – 2023	0	24,808

## Benchmarking – Future Space Need

In all categories except library space, the projected future space need is less than the existing space. The diagrams from Section C, Space Use/Existing Space, benchmark existing space against comparable peers and serve as the best comparison of space per student. The primary difference is that the library space per FTE increases from eleven asf per FTE to 20 asf per FTE when based on future projected need.

## Summary

The analysis suggests that SUNY Geneseo has sufficient capacity to serve its current and future enrollment populations without significantly increasing its total square footage. In 2023, there is a combined instructional space surplus of nearly 93,000 asf. The reallocation of this surplus enables Geneseo to further pursue undergraduate research activity, project-based learning, and innovative and informal learning environments. Some of the library space deficit can also be met through conversion of surplus instructional spaces into study spaces.

Overall, the analysis reveals two major space deficits in campus support space: library space and building service space. The library category records a current deficit of approximately 37,500 asf, which grows to 45,700 asf in the future, and is in large part attributable to the need for additional study space beyond the library. The master plan will explore options that distribute study space throughout the campus to accommodate informal learning, while also examining possible additions to the library that might replace other less useful space. Strategies that reallocate surplus central services space to offset the building service deficit should be considered. In addition to these deficits, the quality and condition of assembly and exhibition space and athletic and recreation spaces should also be considered.

## On-Campus Space – By Department

The following list accounts for all on-campus space by department. The data was extracted directly from the 2009 PSI, according to the 'Department Name' field.

- Administration - Student Affairs – 875 asf
- Administration & Management M&O – 2,335 asf
- Admissions – 2,820 asf
- Admissions – 2,870 asf
- Alumni Relations – 4,512 asf
- Anthropology – 3,660 asf
- Anthropology – 4,086 asf
- Art – 20,086 asf
- ASC (PSI Use)-Campus Store – 4,704 asf
- Automotive Services – 3,960 asf
- Bank-Public Service – 250 asf
- Biology – 38,741 asf
- Buildings-Structural Maintenance – 10,370 asf
- Career Development-Student Placement – 2,135 asf
- Central Duplicating and Printing – 5,502 asf
- Central Stores – 9,711 asf
- Chemistry – 17,534 asf
- Chief Academic Office – 2,064 asf
- Chief Administrative Office – 1,663 asf
- College Advancement – 8,560 asf
- Common Spaces – 7,170 asf
- Communication – 3,704 asf
- Computer Science – 5,743 asf
- Computer Services – 6,677 asf
- Computing and Information Tech – 12,260 asf
- Custodial Services – 32,101 asf
- Dean of Students – 6,014 asf
- Dean's Office - Liberal Studies – 2,044 asf
- Department of Communicative Disorders And Sciences – 10,010 asf
- Director's Office-Grad Div – 534 asf
- Drama – 38,971 asf
- Education – 10,324 asf
- English – 6,108 asf
- Enrollment Services – 491 asf
- Environmental Health & Safety – 504 asf
- EOP Administration – 3,765 asf
- Facilities Planning – 2,358 asf
- Finance & Administration – 14,259 asf
- Financial Aids – 776 asf
- Food Service-FSA (PSI Use) – 63,615 asf
- Foreign Languages – 3,659 asf
- General Library – 55,294 asf

- Geography – 5,160 asf
- Geography – 4,389 asf
- Geology – 15,944 asf
- Grounds Maintenance – 3,547 asf
- Health And Physical Education – 134,293 asf
- History – 3,301 asf
- Human Resources – 1,357 asf
- Institutional Studies – 711 asf
- Instruction General – 78,743 asf
- International Programs – 753 asf
- International Student Services – 1,470 asf
- Mail And Messenger – 2,325 asf
- Mathematics – 5,306 asf
- Microcomputer-Maintenance – 8,970 asf
- Off-Campus Supervised Teaching – 408 asf
- Performing Arts – 9,019 asf
- Philosophy – 2,052 asf
- Physics – 23,456 asf
- Political Science – 1,784 asf
- Psychology – 14,235 asf
- Psychology – 10,060 asf
- Publications – 334 asf
- Purchasing – 1,207 asf
- Recycling – 5,035 asf
- Registrar – 2,459 asf
- Rental of Facilities-Reimbursables – 844
- Research-Post Award Office – 111 asf
- ROTC-Public Service – 115 asf
- School of Business – 6,161 asf
- Security And Safety – 3,517 asf
- Shared – 12,435 asf
- Small Business Development And Micro Enterprise Outreach Centers – 780 asf
- Sociology – 2,460 asf
- Sociology – 3,020 asf
- Special Education – 1,254 asf
- Speech Clinic – 688 asf
- Speech Pathology & Audiology – 6,454 asf
- Sponsored Research Administration – 213 asf
- STATE ORG Office of Mental Retardation And Developmental Disabilities – 14,231 asf
- Student Billing/Cashiering – 1,215 asf
- Student Health Services – 4,231 asf
- Student Union – 52,332 asf
- Telephone And Telegraph – 1,900 asf
- University Information Service – 1,383 asf
- Utilities Plant – 2,236 asf
- VP For College Advancement – 948 asf
- **Total Space – 885,665**

## Departmental Calculation of Space Needs

The following section provides the tabular assessment of space needs by department for categories 1.1 Classrooms through 2.5 General and Special Use. For 1.1 Classrooms, 1.2 Lecture Halls, and 2.1 Instructional Labs, space needs were developed for departments that generated contact hours.

1.1 CLASSROOMS - SUNY	EXISTING SPACE	CURRENT NEED	NEED IN 2013	NEED IN 2018	NEED IN 2023

## **5. Room Schedules by Classroom**

**BLAKE BUILDING B 0208** capacity: 52; size: 835 asf

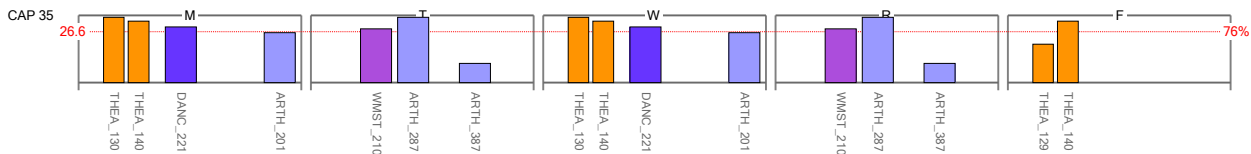

20.4 / 52 seats filled = 39% occupancy

42% utilization (8:00AM to 5:00PM)

**BRODIE FINE ARTS CENTER 0154** capacity: 35; size: 749 asf

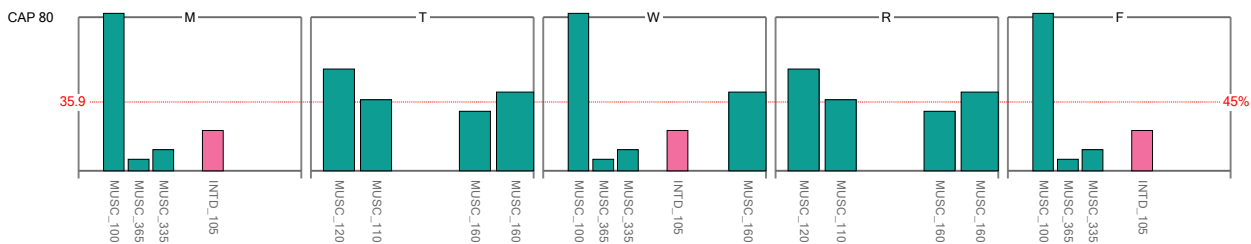

26.6 / 35 seats filled = 76% occupancy

44% utilization (8:00AM to 5:00PM)

**BRODIE FINE ARTS CENTER 0208** capacity: 80; size: 1,476 asf

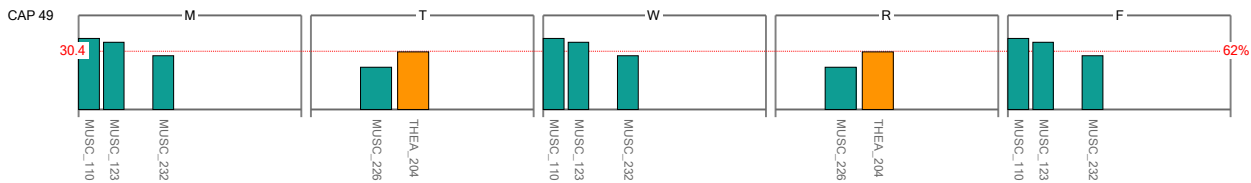

35.9 / 80 seats filled = 45% occupancy

53% utilization (8:00AM to 5:00PM)

**BRODIE FINE ARTS CENTER 0210** capacity: 49; size: 1,829 asf

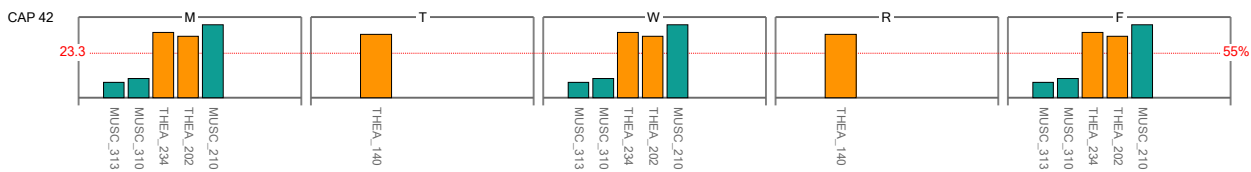

30.4 / 49 seats filled = 62% occupancy

31% utilization (8:00AM to 5:00PM)

**BRODIE FINE ARTS CENTER 0214** capacity: 42; size: 677 asf

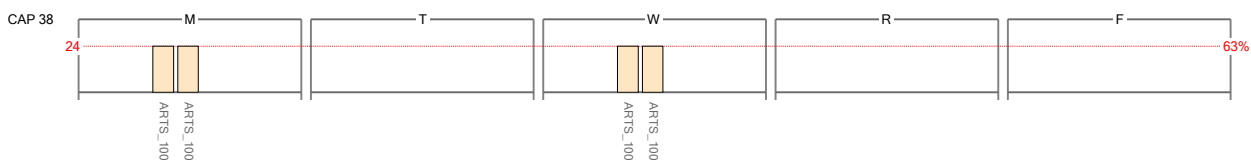

23.3 / 42 seats filled = 55% occupancy

33% utilization (8:00AM to 5:00PM)

**BRODIE FINE ARTS CENTER 0244** capacity: 38; size: 605 asf

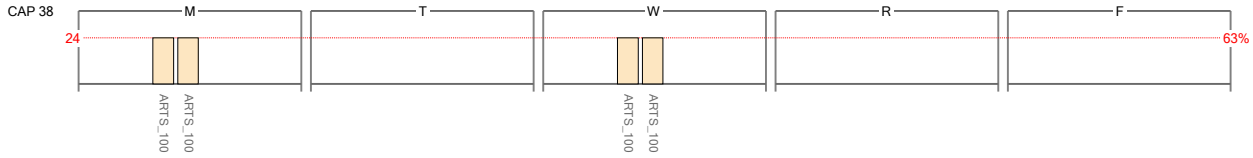

24 / 38 seats filled = 63% occupancy

8% utilization (8:00AM to 5:00PM)

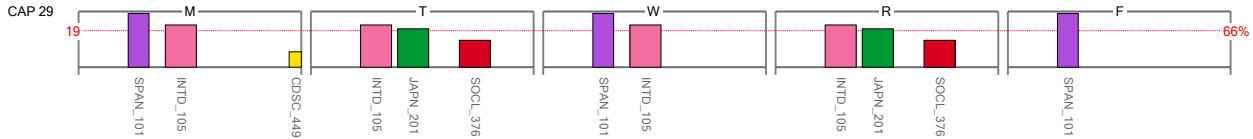

### BRODIE FINE ARTS CENTER 0244 capacity: 38; size: 605 asf

24 / 38 seats filled = 63% occupancy  
8% utilization (8:00AM to 5:00PM)

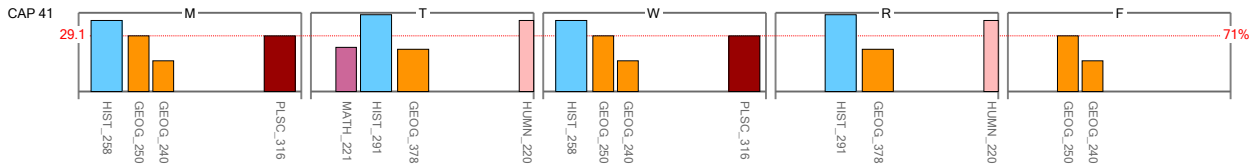

### FRASER BUILDING 0104 capacity: 29; size: 458 asf

19 / 29 seats filled = 66% occupancy  
33% utilization (8:00AM to 5:00PM)

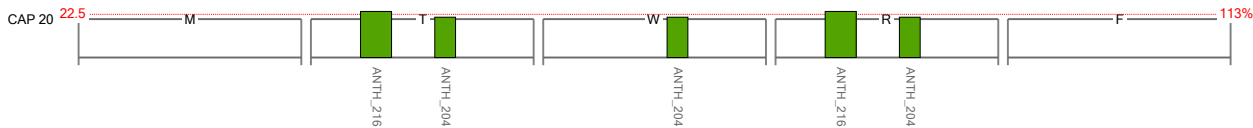

### FRASER BUILDING 0114 capacity: 41; size: 583 asf

29.1 / 41 seats filled = 71% occupancy  
43% utilization (8:00AM to 5:00PM)

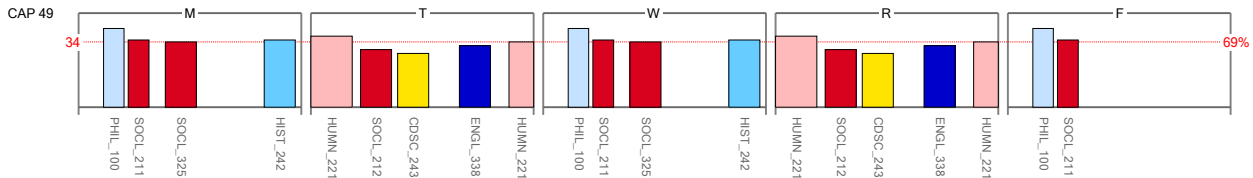

### FRASER BUILDING 0116 capacity: 20; size: 862 asf

22.5 / 20 seats filled = 113% occupancy  
13% utilization (8:00AM to 5:00PM)

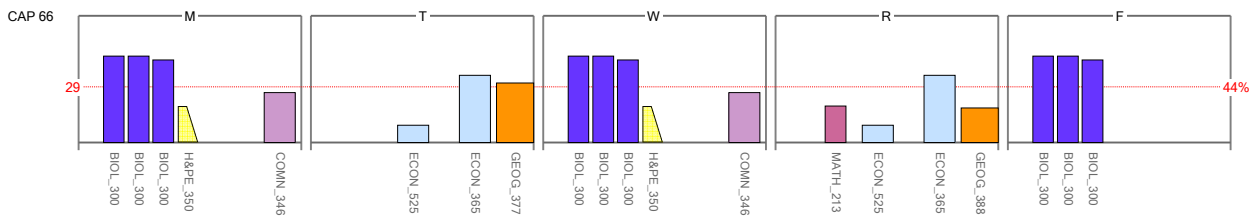

### FRASER BUILDING 0119 capacity: 49; size: 776 asf

34 / 49 seats filled = 69% occupancy  
57% utilization (8:00AM to 5:00PM)

### FRASER BUILDING 0202A capacity: 66; size: 1,060 asf

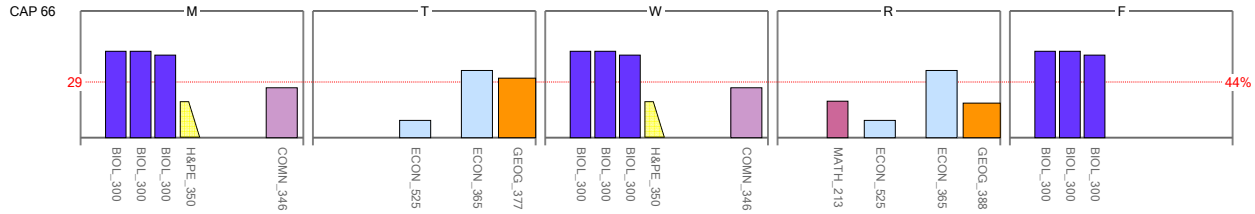

29 / 66 seats filled = 44% occupancy  
51% utilization (8:00AM to 5:00PM)

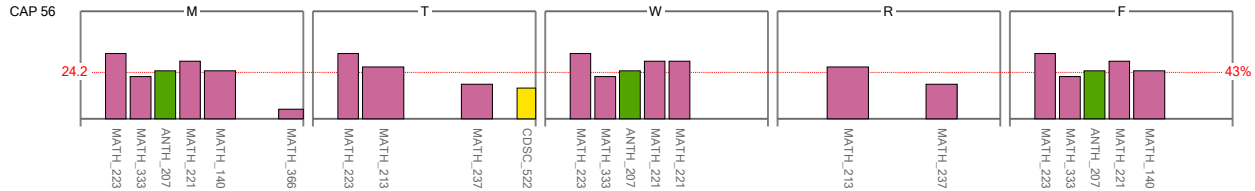

### FRASER BUILDING 0202A capacity: 66; size: 1,060 asf

29 / 66 seats filled = 44% occupancy  
51% utilization (8:00AM to 5:00PM)

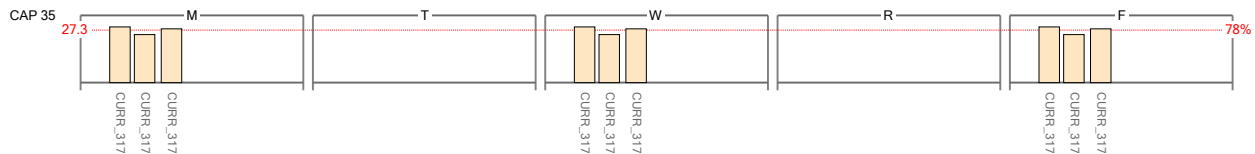

### FRASER BUILDING 0213 capacity: 56; size: 891 asf

24.2 / 56 seats filled = 43% occupancy  
49% utilization (8:00AM to 5:00PM)

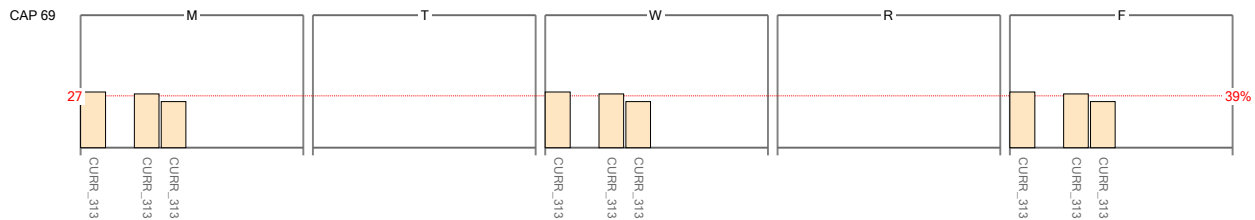

### HOLCOMB LEARNING CENTER 0109 capacity: 35; size: 1,060 asf

27.3 / 35 seats filled = 78% occupancy  
19% utilization (8:00AM to 5:00PM)

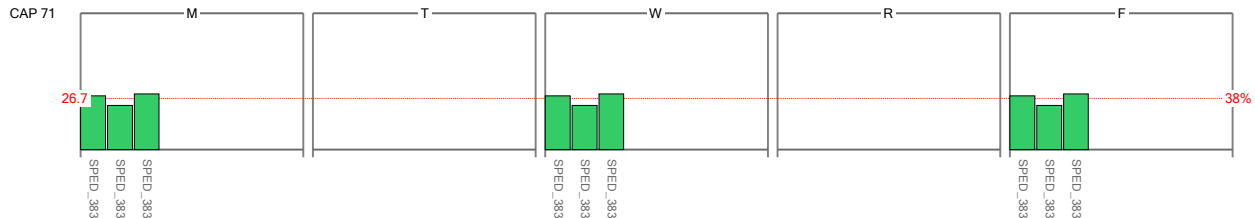

### HOLCOMB LEARNING CENTER 0266 capacity: 69; size: 1,103 asf

27 / 69 seats filled = 39% occupancy  
22% utilization (8:00AM to 5:00PM)

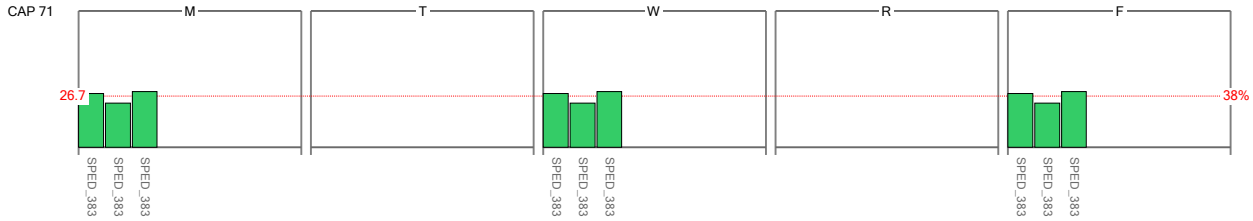

### HOLCOMB LEARNING CENTER 0269 capacity: 71; size: 1,128 asf

26.7 / 71 seats filled = 38% occupancy  
23% utilization (8:00AM to 5:00PM)

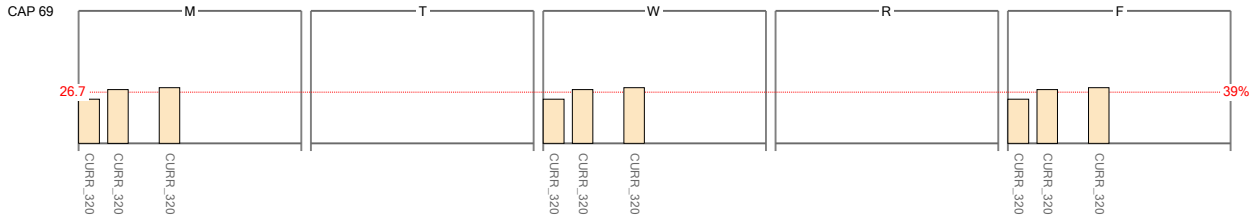

### HOLCOMB LEARNING CENTER 0269 capacity: 71; size: 1,128 asf

26.7 / 71 seats filled = 38% occupancy  
23% utilization (8:00AM to 5:00PM)

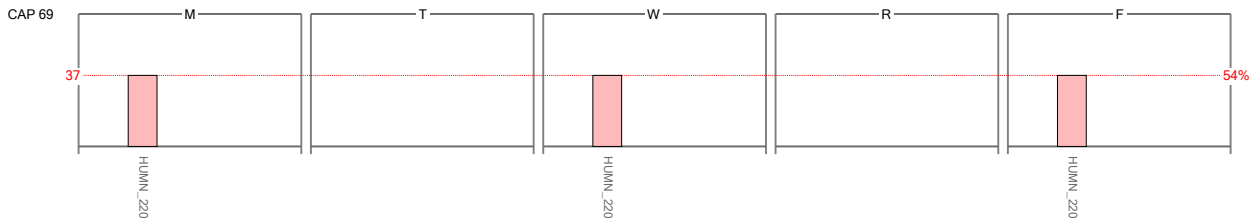

### HOLCOMB LEARNING CENTER 0270 capacity: 69; size: 1,104 asf

26.7 / 69 seats filled = 39% occupancy  
19% utilization (8:00AM to 5:00PM)

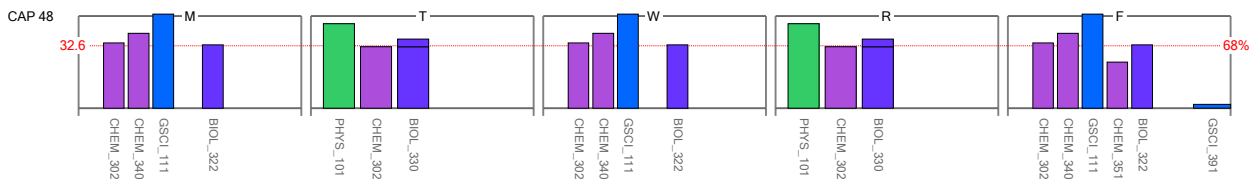

### HOLCOMB LEARNING CENTER 0275 capacity: 69; size: 1,109 asf

37 / 69 seats filled = 54% occupancy  
9% utilization (8:00AM to 5:00PM)

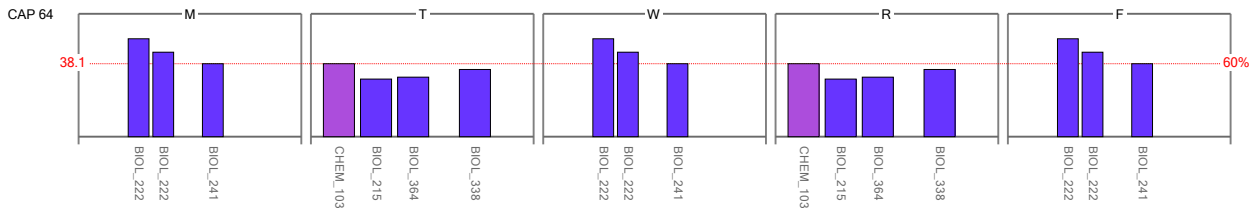

### GREENE SCIENCE BLDG. 0115 capacity: 48; size: 962 asf

32.6 / 48 seats filled = 68% occupancy  
42% utilization (8:00AM to 5:00PM)

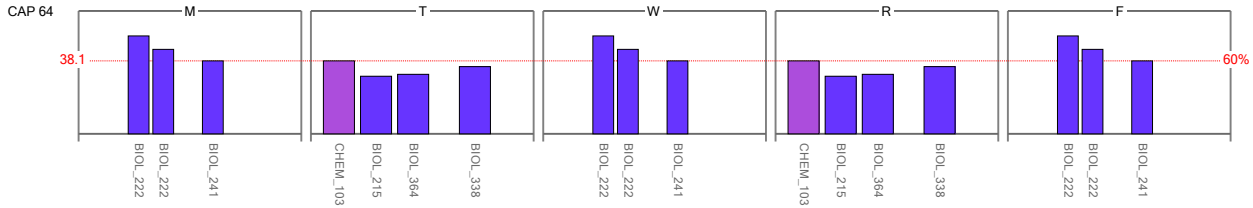

### GREENE SCIENCE BLDG. 0131 capacity: 64; size: 1,209 asf

38.1 / 64 seats filled = 60% occupancy  
42% utilization (8:00AM to 5:00PM)

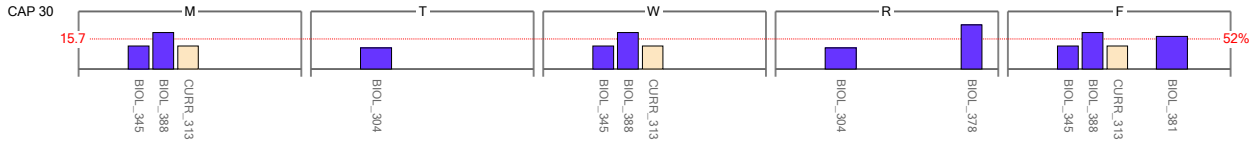

### GREENE SCIENCE BLDG. 0131 capacity: 64; size: 1,209 asf

38.1 / 64 seats filled = 60% occupancy  
42% utilization (8:00AM to 5:00PM)

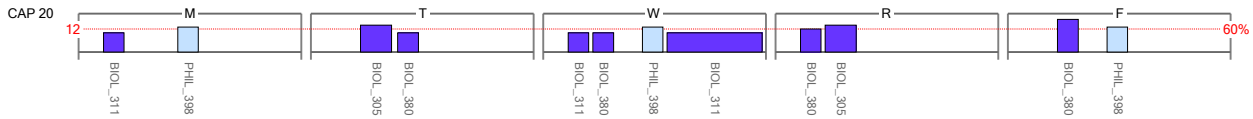

### GREENE SCIENCE BLDG. 0136 capacity: 30; size: 710 asf

15.7 / 30 seats filled = 52% occupancy  
25% utilization (8:00AM to 5:00PM)

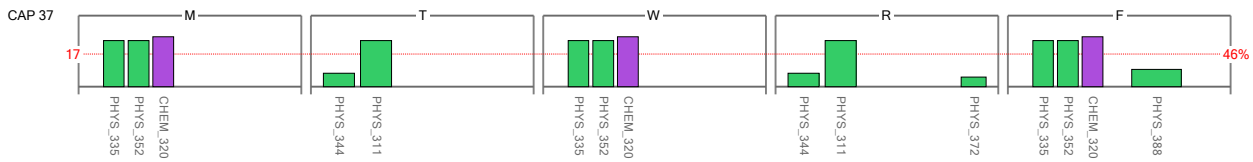

### INTEGRATED SCIENCE CENTER 0137 capacity: 20; size: 577 asf

12 / 20 seats filled = 60% occupancy  
33% utilization (8:00AM to 5:00PM)

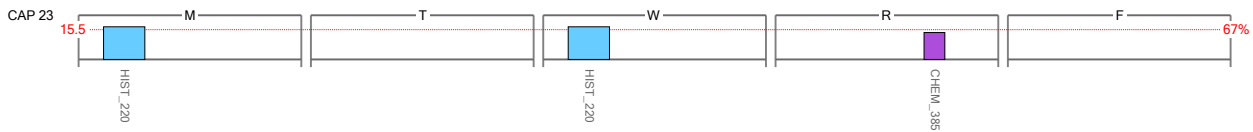

### GREENE SCIENCE BLDG. 0229 capacity: 37; size: 789 asf

17 / 37 seats filled = 46% occupancy  
34% utilization (8:00AM to 5:00PM)

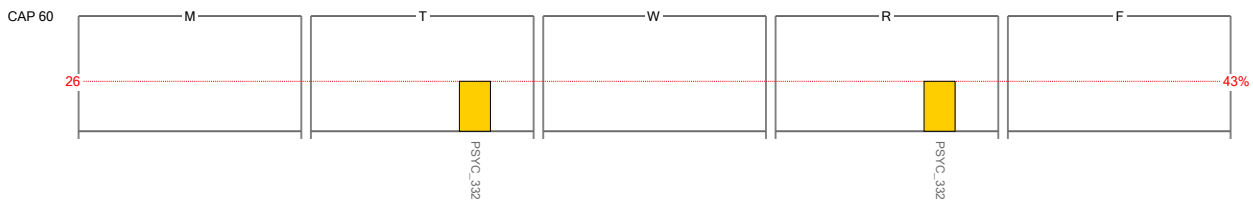

### GREENE SCIENCE BLDG. 0325 capacity: 23; size: 554 asf

15.5 / 23 seats filled = 67% occupancy  
10% utilization (8:00AM to 5:00PM)

### MILNE LIBRARY 0104 capacity: 60; size: 2,842 asf

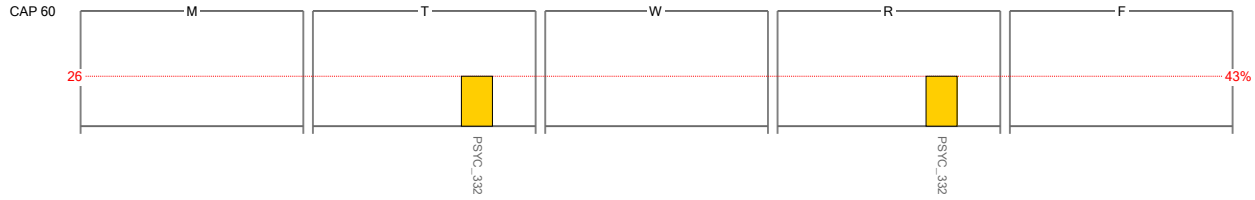

26 / 60 seats filled = 43% occupancy  
6% utilization (8:00AM to 5:00PM)

### MILNE LIBRARY 0104 capacity: 60; size: 2,842 asf

26 / 60 seats filled = 43% occupancy

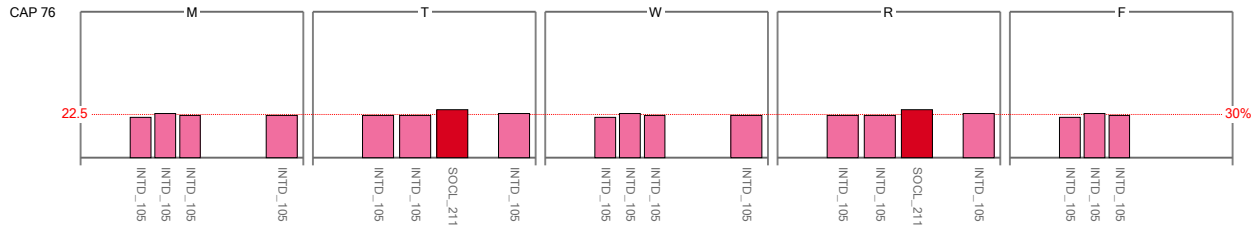

6% utilization (8:00AM to 5:00PM)

### MILNE LIBRARY 0105 capacity: 76; size: 1,213 asf

22.5 / 76 seats filled = 30% occupancy

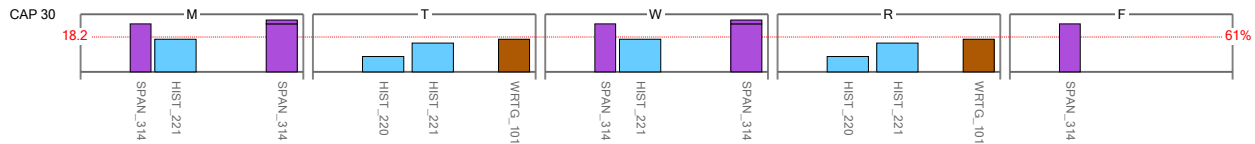

48% utilization (8:00AM to 5:00PM)

### MILNE LIBRARY 0109 capacity: 30; size: 809 asf

18.2 / 30 seats filled = 61% occupancy

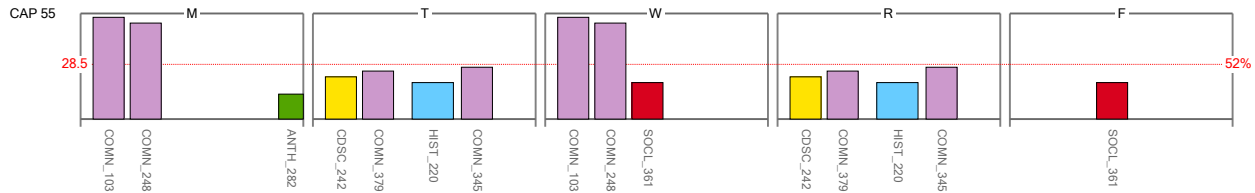

44% utilization (8:00AM to 5:00PM)

### MILNE LIBRARY 0213 capacity: 55; size: 2,010 asf

28.5 / 55 seats filled = 52% occupancy

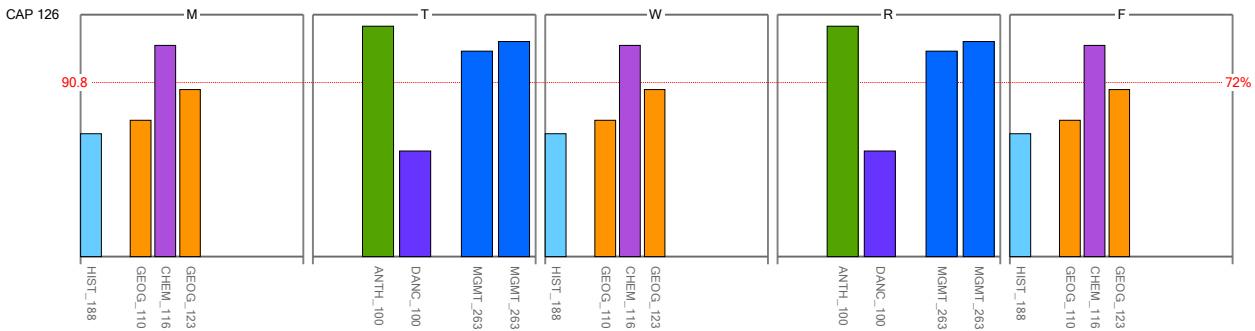

46% utilization (8:00AM to 5:00PM)

### NEWTON LECTURE HALL 0201 capacity: 126; size: 1,542 asf

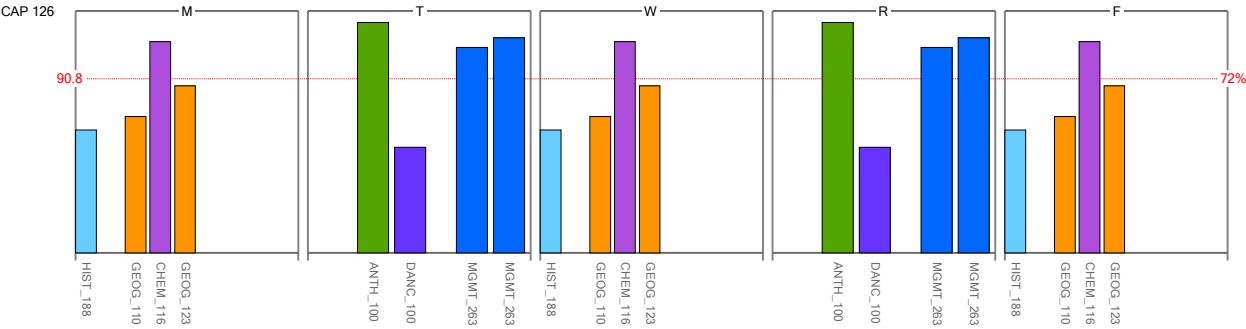

90.8 / 126 seats filled = 72% occupancy

48% utilization (8:00AM to 5:00PM)

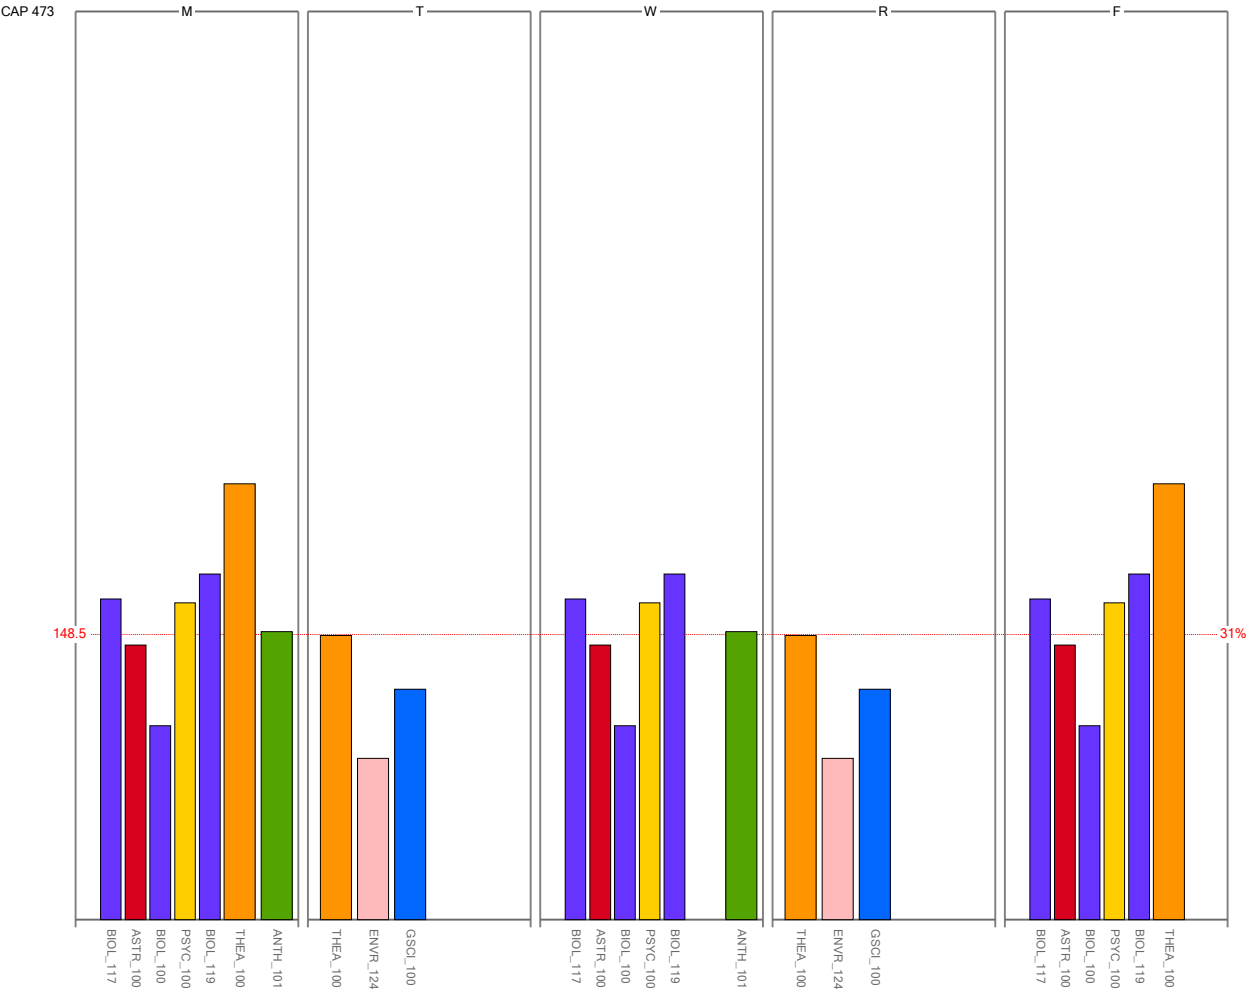

NEWTON LECTURE HALL 0201    capacity: 126; size: 1,542 asf

90.8 / 126 seats filled = 72% occupancy  
48% utilization (8:00AM to 5:00PM)

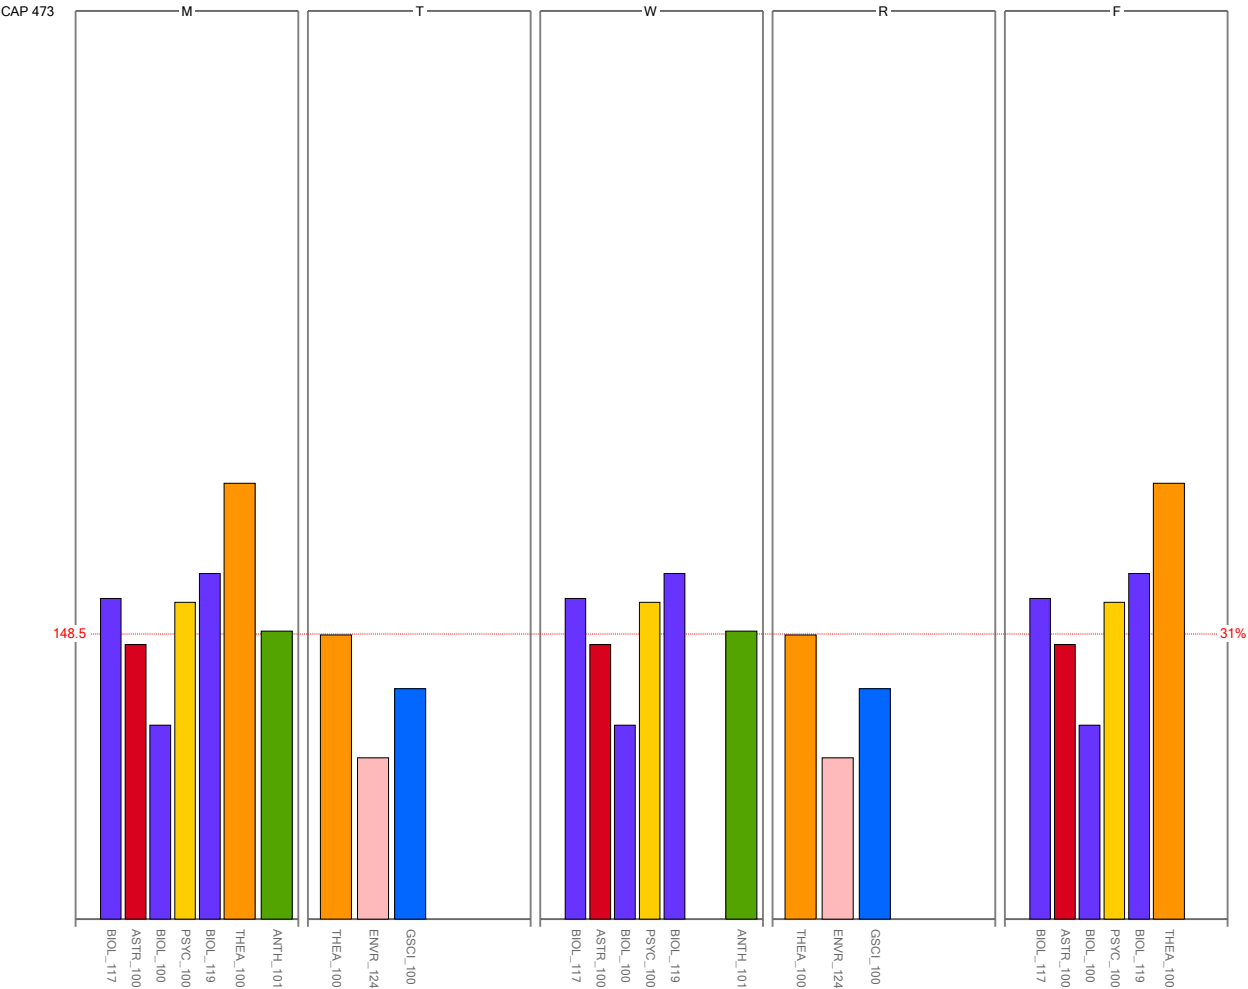

NEWTON LECTURE HALL 0202    capacity: 473; size: 5,364 asf

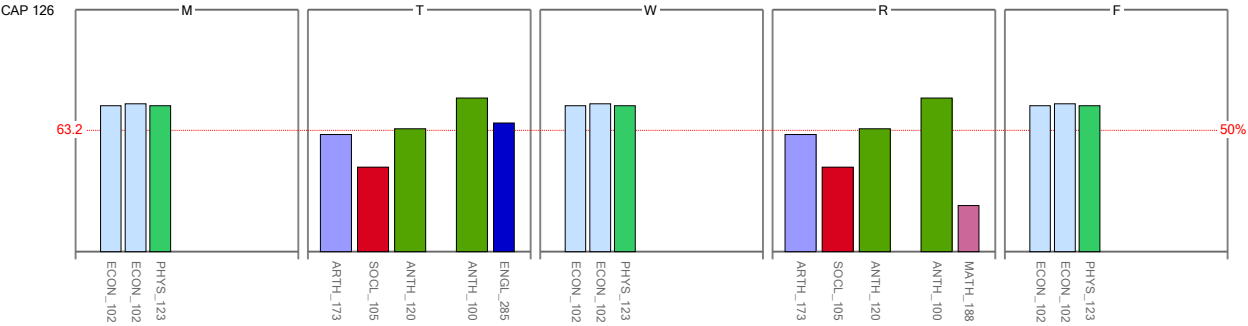

148.5 / 473 seats filled = 31% occupancy  
55% utilization (8:00AM to 5:00PM)

NEWTON LECTURE HALL 0202    capacity: 473; size: 5,364 asf  
 148.5 / 473 seats filled = 31% occupancy  
 55% utilization (8:00AM to 5:00PM)

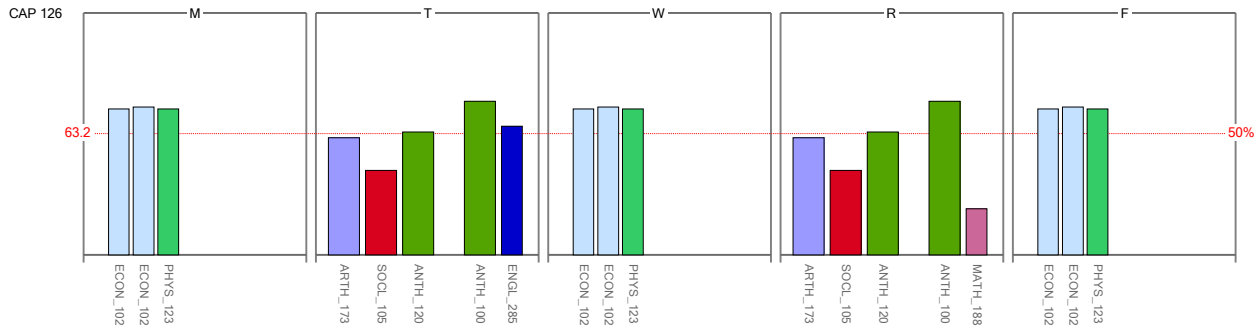

NEWTON LECTURE HALL 0203    capacity: 126; size: 1,542 asf  
 63.2 / 126 seats filled = 50% occupancy
