

THE LONELY REALITY *of an* ACADEMIC DREAMER

*A Campus Lecture
by Pamela E. Harris,
Assistant Professor
of Mathematics
Williams College*

After emigrating to the United States from Mexico at the age of 12, Assistant Professor of Mathematics Pamela Harris completed her high school education in Milwaukee and then earned her B.S., M.S. and Ph.D. degrees from Marquette University and the University of Wisconsin-Milwaukee. Join us as Dr. Harris shares her life story – from her fears of being an undocumented first-generation college student to the challenges she overcame as a woman of color with a passion for STEM to the support networks and mentors that helped shape her identity as a scientist. She will also share how communities can help support underrepresented minorities and undocumented students achieve their full potential as they pursue their academic careers.

Thursday, January 25, 2018
Newton Hall, Room 202
7:00pm
(free and open to the public)

This lecture is a part of Math Research Weekend sponsored by SUNY Geneseo Department of Mathematics with support from the Office of the Provost
