

SUNY Geneseo Noyce Summer Internship Application: Personal Statement Guidelines

Geneseo undergraduates can benefit from Noyce-sponsored teaching programs in their first and second year of study by applying to be summer interns at science camps, museums, and other science related enrichment programs. Summer interns will attend a two-week internship orientation at the end of May to learn innovative teaching strategies with guidance from Geneseo Physics and Education faculty.

Write a personal statement of no more than 500 words highlighting your interest in STEM education. In your statement please describe at least one experience or project that made you enthusiastic about your field of study.

Send your Personal Statement in hard copy or as e-mail attachment to the address below by February 14, 2020.
