

Assignment #10: Sketchup

Due on May 5, 2023.

Use SketchUp to make models of the following four objects that we've already seen this semester. Put all four into the same .skp file, then "download" it so you can submit it to me. You don't have to color them, but you are permitted to color them.

Make the longest axis of each somewhere in the ballpark of 100 mm.
