Assignment #10: Sketchup

Due on May 9, 2025.

Use SketchUp to make models of the following four objects that we've already seen this semester. Put all four into the same .skp file, then "download" it so you can submit it to me in the Google Drive. You don't *have* to color them, but you are *permitted* to color them.

Make the longest axis of each somewhere in the ballpark of 100 mm.
