An internal control review analyzes policies and procedures to ensure they are functioning as intended and that they assist the College’s departments in meeting their goals and objectives. The SUNY Geneseo Internal Control Program identifies the administrative functions necessary for the College to carry out its mission. These functions are then reviewed and evaluated on a three-year cycle by a survey assessment tool to detect conscious or unintended abuses or operational deficiencies.

**Training**
Training is an ongoing component of the College’s Internal Control Program. The College provides training in several formats, including written guidelines and memoranda, training sessions, short training media, and reference materials.
